| | CGSM Capital Group Short Duration Municipal Income ETF | Muni National Short | Pursues income exempt from regular federal income tax with low interest rate sensitivity |

*Also available on the Advisory Solutions platform.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

Capital Group exchange-traded funds (ETFs) are actively managed and do not seek to replicate a specific index. ETF shares are bought and sold through an exchange at the then current market price, not net asset value (NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV when traded on an exchange. Brokerage commissions will reduce returns. There can be no guarantee that an active market for ETFs will develop or be maintained, or that the ETF's listing will continue or remain unchanged.

As nondiversified funds, Capital Group ETFs have the ability to invest a larger percentage of assets in securities of individual issuers than a diversified fund. As a result, a single issuer could adversely affect a fund's results more than if the fund invested a smaller percentage of assets in securities of that issuer. See the applicable prospectus for details.

For CGGR, CGGO, CGXU, CGUS, CGSD, CGCP, CGMS, CGIE, CGDG, CGCB and CGBL, investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

For CGSD, CGCP, CGMS, CGMU, CGCB, CGSM and CGBL, the return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

For CGSD, CGCP, CGMS, CGCB and CGBL, the use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds.

For CGCP, CGMS, CGMU, CGSM and CGBL, lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

For CGMU and CGSM, income from municipal bonds may be subject to state or local income taxes and/or the federal alternative minimum tax. Certain other income, as well as capital gain distributions, may be taxable.

For CGBL, CGSD, CGCP and CGMS, investments in mortgage-related securities involve additional risks, such as prepayment risk, as more fully described in the prospectus.
