### Management's discussion of fund performance

The fund's Class T shares gained 5.32% for the year ended July 31, 2024. That result compares with a 3.74% gain for the Bloomberg Municipal Bond Index.

#### What factors influenced results

Toward the end of 2023, the municipal bond market rallied alongside declining U.S. Treasury yields. With investors in the market more willing to take on risk during the last year, lower quality bonds significantly outpaced their higher quality counterparts, despite the elevated rate volatility.

This market environment generally favored riskier bonds, and the portfolio's investments that were lower in quality and higher in interest rate sensitivity were strongly supportive in general. Idiosyncratic security selection was also a factor in overall results, as bottom-up investment research provided opportunity for the fund to build a diversified portfolio of high-conviction ideas.

At the same time, the fund's limited exposure to certain lower quality investments across a variety of sectors and those with lower duration characteristics detracted from overall returns.

#### How a hypothetical \$10,000 investment has grown

Figures reflect deduction of the maximum sales charge and assume reinvestment of dividends and capital gains.

## Portfolio quality summary\*

\* Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch as an indication of an issuer's creditworthiness. In assigning a credit rating to a security, the fund looks specifically to the ratings assigned to the issuer of the security by Standard & Poor's, Moody's and/or Fitch. If agency ratings differ, the security will be considered to have received the highest of those ratings, consistent with the fund's investment policies.
