

Equity-focused mutual funds with enduring, index-beating lifetime results

Proponents of index investing claim it is nearly impossible to beat the index over the long term. Yet, nearly all of our equity-focused American Funds, offered by Capital Group, have generated index-beating lifetime results, even though there have been times when the funds lagged their indexes.

EXHIBIT DETAILS

Shows lifetime annual returns of our 20 equity-focused funds as of December 31, 2023, including our first fund that was launched in 1934.

1.40% pts

Average annual excess return over 806 combined fund years, as of December 31, 2023*

Figures shown are past results for Class F-2 shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

*Time-weighted average annual excess return across our 20 equity-focused American Funds. The equal-weighted average annual excess return is 1.29 percentage points. The time-weighted average gives greater emphasis to those funds that have been in existence longer. For example, this means that the 1.25 percentage-point annualized difference between The Investment Company of America and its benchmark is given proportionally greater weighting in alignment with its more than 90 years in existence when calculating the average across all 20 funds.

Returns are average annual total returns for benchmark indexes and average annual returns for funds at net asset value from fund inception through 12/31/23. Refer to the next page for a list of the indexes used for comparison with each of the American Funds.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Past results are not predictive of results in future periods.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The expense ratios are as of each fund's prospectus available at the time of publication. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Visit capitalgroup.com for more information. For American Funds International Vantage Fund, the investment adviser is currently reimbursing a portion of other expenses. Net expense ratios reflect the reimbursement, without which they would have been higher. The reimbursement will be in effect through at least January 1, 2025. The adviser may elect at its discretion to extend, modify or terminate the reimbursement at that time. Refer to the fund's most recent prospectus for details.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

Class F-2 shares were first offered on August 1, 2008. Class F-2 share results prior to the date of first sale are hypothetical based on results of the original share class without a sales charge, adjusted for typical estimated expenses. Results for certain funds with an inception date after August 1, 2008, also include hypothetical returns because those funds' Class F-2 shares sold after the funds' date of first offering. Visit **capitalgroup.com** for more information on specific expense adjustments and the actual dates of first sale. For American Funds Global Insight Fund and American Fund International Vantage Fund, Class F-2 shares were first offered on November 8, 2019. Class F-2 share results prior to the date of first sale are hypothetical based on the results of the original share class of the fund, adjusted for typical estimated expenses. Visit capitalgroup.com for more information on specific expense adjustments and the actual dates of first sale are hypothetical based on the results of the original share class of the fund, adjusted for typical estimated expenses. Visit capitalgroup.com for more information on specific expense adjustments and the actual dates of first sale.
