

Investing in global companies for the long term

The Securities and Exchange Commission has adopted new regulations that will change the content and design of annual and semi-annual shareholder reports beginning in July 2024. Certain types of information, including investment portfolio and financial statements, will not be included in the shareholder reports but will be available online, delivered free of charge upon request, and filed on a semi-annual basis on Form N-CSR.

If you would like to receive shareholder reports and other communications from the fund electronically, you may update your mailing preferences with your financial intermediary or enroll in e-delivery at capitalgroup.com (for accounts held directly with the fund).

American Funds Insurance Series, by Capital Group, is the underlying investment vehicle for many variable annuities and insurance products. For over 90 years, Capital Group has invested with a long-term focus based on thorough research and attention to risk.

Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Investing in small-capitalization stocks can involve greater risk than is customarily associated with investing in stocks of larger, more established companies. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. High-yield bonds are subject to greater fluctuations in value and risk of loss of income and principal than investment-grade bonds. Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch as an indication of an issuer's creditworthiness. The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional cash securities, such as stocks and bonds. Hedge instruments, including exchange-traded futures contracts and exchange-traded put options, may not provide an effective hedge of the underlying securities because changes in the prices of such instruments may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the underlying funds in certain market conditions. Refer to the funds' prospectuses and the Risk Factors section of this report for more information on these and other risks associated with investing in the funds.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

We are pleased to present the annual report for American Funds Insurance Series® for the year ended December 31, 2023.

Regarding the investment environment, global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI All Country World Index¹, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

U.S. equities advanced amid economic growth, moderating inflation and a slowdown in the pace of U.S. Federal Reserve interest rate hikes. Despite market jitters over a major banking crisis in March/April, and wars in Ukraine and the Middle East, the S&P 500 Index² climbed 26.29%. The information

All market returns referenced in this report are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Country returns are based on MSCI indexes, which reflect reinvestment of distributions and dividends net of withholding taxes, except for the MSCI USA Index, which reflects dividends gross of withholding taxes. Source: MSCI.

¹Source: MSCI. MSCI ACWI is a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes. Results reflect dividends net of withholding taxes.

²Source: S&P Dow Jones Indices LLC. S&P 500 Index is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

³Source: MSCI. MSCI Europe Index is a free float-adjusted market capitalization-weighted index that is designed to measure results of more than 10 developed equity markets in Europe. Results reflect dividends net of withholding taxes.

⁴Source: MSCI. MSCI Emerging Markets Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global emerging markets, consisting of more than 20 emerging market country indexes. Results reflect dividends net of withholding taxes.

technology, consumer discretionary and communication services sectors led as growth stocks significantly outpaced value.

European stocks rallied as inflation declined from high levels, raising expectations that European Central Bank officials will begin cutting interest rates in 2024. Stock prices moved higher throughout the 20-member eurozone despite signs of weakening economic growth in most countries, including Germany and France, Europe's largest economies. Overall, the MSCI Europe Index³ rose 19.89% for U.S. dollar-based investors and 14.30% in local currency terms.

Emerging markets stocks rose despite China's slowing economy. Interest rate cuts in several developing countries as well as expected cuts in the U.S. helped returns, along with economic growth and U.S. dollar weakness. Overall, the MSCI Emerging Markets Index⁴ gained 9.83%.

Bonds markets also rebounded, rallying on expectations that the U.S. Federal Reserve, the European Central Bank and others are not only done with rate hikes but are planning rate cuts in 2024. Virtually all segments of the bond market generated strong returns in contrast to the severe downturn in 2022.

Past results are not predictive of results in future periods.

The U.S. Treasury yield curve⁵ steepened modestly as the two-year yield fell 18 basis points (bps) to end at 4.25% while the 10-year yield ended unchanged at 3.88%. All major U.S. fixed income sectors posted positive returns. The Bloomberg U.S. Aggregate Index⁶ advanced 5.53%. Corporate markets led U.S. bond returns for the year. The Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index⁷ and Bloomberg U.S. Corporate Investment Grade Index⁸ rose 13.44% and 8.52%, respectively. Both sectors benefited from narrowing spreads,⁹ which fell 146 bps for high-yield bonds and 31 bps for investment-grade corporates.

In foreign exchange markets, the U.S. dollar fluctuated, and by year-end, had registered small to moderate declines against the euro, the British pound, the Brazilian real and most other currencies.

Looking ahead

The strong stock market returns of 2023, after a rough 2022, were a surprise to many. It is testimony to the power of factors such as interest rates and the economy, as well as prospects for individual stocks (for example, the potential positive impact of artificial intelligence), over the persistent negative headlines we read in the media. That is good news for investors like us, who focus on the long run.

Going forward into 2024, big questions remain. One question is certainly inflation and its impact on interest rates. From a starting point of 3% to 4%, many market participants expect U.S. inflation to soon drop into the 2% to 3% range and put downward pressure on interest rates. While that may happen, we would not be surprised to see inflation remain a bit more persistent than these expectations.

Another question is geopolitical risk. The market digested the ongoing conflicts in Ukraine and the Middle East with no real issues in 2023, but the possibility of further spread remains. We hope for peace but must prepare for any outcome.

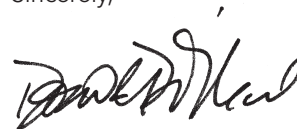

A final question to mention is the U.S. election. Elections often have an impact on markets, and that's especially true when the outcome is as uncertain as it is this year. It is currently difficult to handicap how many candidates will draw meaningful votes, much less predict the winner.

All in all, it is likely that stock markets in 2024 will not be as strong as they were in 2023, but that doesn't mean investors should worry. Less positive does not mean negative, and that is especially true for returns in the long run. As investors, we (like you) know the value of holding companies that have good fundamentals and reasonable valuation, which can offer

superior outcomes over time. We believe this is a successful long term investment strategy, one that we have employed since the inception of our firm.

We will continue to conduct world-class research and to utilize The Capital System™ of investment management. Armed with deep knowledge and aided by robust internal debate, our portfolio managers and investment analysts focus on their highest conviction ideas. This is the time-tested process we use to pursue favorable risk-adjusted returns for our shareholders. We thank you for your continued support of our efforts and look forward to reporting back to you in six months.

Sincerely,

Donald D. O'Neal
Co-President

Alan N. Berro
Co-President

February 12, 2024

⁵Yield curves plot interest rates of bonds of equal credit and different maturities. They include normal, inverted and flat. Normal curves point to economic expansion, and downward-sloping curves point to economic recession. (Source: Investopedia.com.)

⁶Source: Bloomberg Index Services Ltd. Bloomberg U.S. Aggregate Index represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market.

⁷Source: Bloomberg Index Services Ltd. Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index covers the universe of fixed-rate, non-investment-grade debt. The index limits the maximum exposure of any one issuer to 2%.

⁸Source: Bloomberg Index Services Ltd. Bloomberg U.S. Corporate Investment Grade Index represents the universe of investment-grade, publicly issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity and quality requirements.

⁹The difference in yield between a U.S. Treasury and a corporate bond of the same maturity is referred to as a credit spread, also known as a yield spread. Historically, spreads tend to narrow when the economy is doing well, and they tend to widen when the economy is doing poorly. (Source: Investopedia.com.)

Past results are not predictive of results in future periods.

About the series

Unless otherwise indicated, American Funds Insurance Series investment results are for Class 1 shares (Class P1 shares for managed risk funds). Class 1A shares began operations on January 6, 2017. Class 2 shares began operations on April 30, 1997. Class 3 shares began operations on January 16, 2004. Class 4 shares began operations on December 14, 2012. Results encompassing periods prior to those dates assume a hypothetical investment in Class 1 shares and include the deduction of additional annual expenses (0.25% for Class 1A shares, 0.25% for Class 2 shares, 0.18% for Class 3 shares and 0.50% for Class 4 shares).

The variable annuities and life insurance contracts that use the series' funds contain certain fees and expenses not reflected in this report. Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Visit capitalgroup.com/afis for more information.

The investment adviser is currently waiving a portion of its management fee for Global Growth Fund, Global Small Capitalization Fund, New World Fund, Washington Mutual Investors Fund, Capital World Growth and Income Fund, International Growth and Income Fund, Capital Income Builder, American Funds Global Balanced Fund, The Bond Fund of America, American High-Income Trust, American Funds Mortgage Fund and U.S. Government Securities Fund. The waivers will be in effect through at least May 1, 2024. The waivers may only be modified or terminated with the approval of the series' board. Applicable fund results shown reflect the waivers, without which results would have been lower. Refer to the Financial Highlights tables in this report for details.

For the managed risk funds, the investment adviser is currently waiving a portion of its management fee equal to 0.05% of each fund's net assets. In addition, the investment adviser is currently reimbursing a portion of other expenses for Managed Risk International Fund and Managed Risk Washington Mutual Investors Fund. The waivers and reimbursement will be in effect through at least May 1, 2024, unless modified or terminated by the series' board. After that time, the investment adviser may elect to extend, modify or terminate the reimbursement. The waivers may only be modified or terminated with the approval of the series' board. Applicable fund results shown reflect the waivers and reimbursement, without which results would have been lower. Refer to the Financial Highlights tables in this report for details.

The Managed Risk Growth Fund pursues its objective by investing in shares of American Funds Insurance Series® – Growth Fund and American Funds Insurance Series® – The Bond Fund of America. The Managed Risk International Fund pursues its objective by investing in shares of American Funds Insurance Series® – International Fund and American Funds Insurance Series® – The Bond Fund of America. The Managed Risk Washington Mutual Investors Fund pursues its objective by investing in shares of American Funds Insurance Series® – Washington Mutual Investors Fund and American Funds Insurance Series® – U.S. Government Securities Fund. The Managed Risk Growth-Income Fund pursues its objective by investing in shares of American Funds Insurance Series® – Growth-Income Fund and American Funds Insurance Series® – The Bond Fund of America. The Managed Risk Asset Allocation Fund pursues its objective by investing in shares of American Funds Insurance Series® – Asset Allocation Fund. The funds seek to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded futures. The benefit of the funds' managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the funds' results can be expected to lag those of the underlying fund.

Funds are listed in the report as follows: equity, balanced, fixed income and managed risk.

Global Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Growth Fund increased 22.91% for the 12 months ended December 31, 2023, compared with a return of 22.20% in its benchmark index, MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Within the fund, sector selection in the utilities and financials sectors were among the top contributors to relative returns.² Larger-than-index positions in Novo Nordisk and Chipotle Mexican Grill were among the top individual contributors to the portfolio. Danish biopharmaceutical firm Novo Nordisk, an innovator in the treatment and management of diabetes and obesity, saw its shares rise on strong financial results and clinical trial outcomes. Meanwhile, Chipotle experienced double-digit revenue growth in 2023, driven by strong earnings and higher operating margin. On the downside, sector selection in health care and stock selection in information technology detracted from relative results. Smaller-than-benchmark weights in Apple and Amazon.com were among the top individual detractors.

On a geographic basis, stocks of companies domiciled in the United States and Denmark were among the top contributors to results, while stocks of companies based in Germany and Hong Kong were among the top detractors.

The fund's portfolio managers are optimistic they will continue to find good companies globally that offer high-quality products and services, and whose values are not yet fully reflected in their share prices.

Global Small Capitalization Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Global Small Capitalization Fund advanced 16.45% for the 12 months ended December 31, 2023. Its benchmark, the MSCI All Country World Small Cap Index,¹ a free float-adjusted market capitalization-weighted index designed to measure equity market results of smaller capitalization companies in both developed and emerging markets, returned 16.84%.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI All Country World Index, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

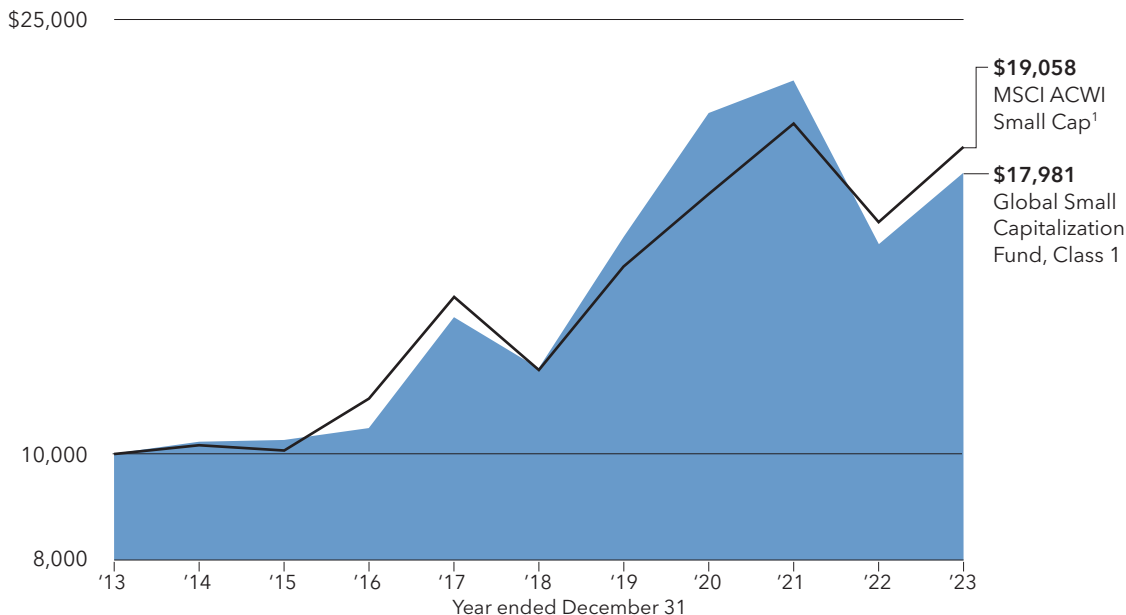

Within the portfolio, stock selection within the financials sector contributed positively to relative returns.² A larger-than-index investment in Draftkings was among the fund's top individual contributors over the period. On the downside, stock selection within the information technology sector detracted from returns. Within individual securities, health care provider Insulet was a top detractor, as its stock lagged the broader market.

Geographically, investments in companies domiciled in the United States and India were overall additive to returns, while investments in those domiciled in Italy and China were detractors, overall.

Looking ahead, one thing that the portfolio managers know is that unexpected events will shape the market environment in 2024. That said, we also believe our robust global research will allow us to continue to identify attractive investment opportunities in companies with long-term potential. We thank you for the support you have shown for the fund thus far and we look forward to reporting back to you in another six months.

Where the fund's assets were invested as of December 31, 2023

Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Growth Fund returned 38.81% for the 12 months ended December 31, 2023, compared with an increase of 26.29% in its benchmark index, S&P 500 Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

U.S. equities advanced amid strong economic growth, moderating inflation and a slowdown in the pace of U.S. Federal Reserve interest rate hikes despite market jitters over a major banking crisis and wars in Ukraine and the Middle East. The information technology, consumer discretionary and communication services sectors led as growth stocks significantly outpaced value. The Nasdaq Composite, a market capitalization-weighted index that is heavily weighted toward the technology sector, soared 43.42%.

Regarding the fund, stock selection within the communication services and industrials sectors were the top contributors to relative returns.² A larger-than-benchmark position in Meta Platforms buoyed results as the company adopted a posture of cost cutting and operational efficiency that, when combined with strong user growth, drove near record-high revenue. On the downside, a lower-than-benchmark position in the information technology sector weighed on results and a smaller-than-benchmark position in NVIDIA detracted from returns.

Looking forward, the fund's managers take an overall positive view of economic indicators for the coming year. Inflation has declined meaningfully, although it remains above the Federal Reserve's target. Likewise, the Fed has paused its recent pattern of interest rate hikes and the U.S. economy has remained incredibly resilient throughout. Whether and when the pause will pivot to rate cuts is likely dependent on how quickly inflation reaches a level the central bank is comfortable with, but the idea of a soft landing seems far more realistic than a year ago. Regardless of the outcome, the managers will continue to focus on opportunities for long-term capital appreciation based on a time-tested investment approach in pursuit of superior returns for investors.

International Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

International Fund returned 16.12% for the 12 months ended December 31, 2023, compared with the 15.62% return of its benchmark index, MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes, excluding the U.S.).

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI ex USA, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Within the portfolio, stock selection within the information technology and consumer discretionary sectors boosted relative returns.² Within individual securities, a larger-than-index position in South Korean chipmaker SK Hynix was among the top individual contributors. On the downside, stock selection within the materials and financials sectors dragged on returns. A larger-than-index position in the Canadian mining and metals company, First Quantum Minerals, was a detractor.

The new year looks to continue current macroeconomic uncertainty and trends stemming from shifting monetary policies and geopolitical tensions around the world. Overall, the fund's portfolio managers have a positive view of economic indicators for the coming year and, supported by our global research capabilities, believe they will continue to identify attractive investment opportunities in companies with long-term potential for investors.

New World Fund returned 16.22% for the 12 months ended December 31, 2023. Its benchmark index, MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), advanced 22.20%. The MSCI Emerging Markets (EM) Index,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global emerging markets (consisting of more than 20 emerging market country indexes), returned 9.83%.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Emerging markets stocks rose despite China's slowing economy. Interest rate cuts in several developing countries as well as expected cuts in the U.S. helped returns, along with economic growth and U.S. dollar weakness.

Within the portfolio, stock selection in the health care and consumer staples sectors contributed to the fund's relative returns.² Danish biopharmaceutical firm Novo Nordisk was a top individual contributor, as its stock saw returns that outpaced the broader market. Online e-commerce firm MercadoLibre was also a positive contributor. On the downside, stock selection within the information technology sector dragged on relative returns. Among individual securities, smaller-than-benchmark positions in NVIDIA and Apple detracted from relative results.

The investment environment remains challenging, with a wide range of uncertainties affecting equity prices, including global shifts in monetary policy and elevated geopolitical tensions. The portfolio managers believe the fund's flexibility in seeking investments in both the developed world and emerging markets will provide significant opportunities in these conditions. They remain confident that on-the-ground research, a cornerstone of their investment process, will provide highly differentiated investment insights leading to potentially superior outcomes over the long term.

Washington Mutual Investors Fund returned 17.66% for the 12 months ended December 31, 2023. Its benchmark index, S&P 500 Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, advanced 26.29%.

U.S. equities advanced amid strong economic growth, moderating inflation and a slowdown in the pace of U.S. Federal Reserve interest rate hikes despite market jitters over a major banking crisis and wars in Ukraine and the Middle East. The information technology, consumer discretionary and communication services sectors led as growth stocks significantly outpaced value.

Regarding the fund, stock selection in the financials sector was one of the top contributors to relative returns.² Among individual securities, a higher-than-benchmark position in Broadcom was a top contributor, as the stock outpaced the broader equity market. On the downside, security selections within the consumer discretionary sector weighed on returns. A lower-than-index position in Amazon.com weighed on relative returns as the stock outpaced the market overall.

Looking ahead, while the market has priced-in a soft landing, an inverted yield curve³ could signal a looming recession. Offsetting this view has been a string of low unemployment numbers that point to strength in the economy. In the meantime, the Fed appears to remain committed to lowering inflation by holding rates at higher levels for longer. In 2024, the fund's portfolio managers will begin to get a clean read on the health of the consumer as pandemic-era stimulus and support wanes and the cumulative effects of monetary policy take hold. Those effects could portend higher volatility and more downside in the markets, or taming inflation and a downbeat economy could send stocks higher. Time will tell. Regardless of the outcome, we will continue to favor well-managed, high-quality companies that are capable of paying dividends in myriad economic environments. We remain optimistic that this focus, supported by our global research, will help us to identify attractive long-term investment opportunities.

Capital World Growth and Income Fund returned 21.22% for the 12 months ended December 31, 2023, compared with a 22.20% increase in its benchmark index, MSCI ACWI (All Country World Index),¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Within the portfolio, stock selection within the industrials sector was a top contributor to relative returns.² Results were also helped by holdings in Broadcom, which saw returns over the period that outpaced the broader market as falling interest rate expectations raised hopes of an overall improvement in global demand for electronics products. On the downside, the portfolio's lower-than-benchmark position in NVIDIA and stock selection within the financials sector were among the top detractors to returns. The portfolio's position in Vale, a Brazil-based mining company, also weighed on returns as shares fell amid faltering Chinese demand and worries on the strength of the country's economic recovery together with mixed financial results.

On a geographical basis, stocks domiciled in the eurozone contributed the most to relative returns, while the portfolio's holdings in Brazil were among the largest detractors from overall returns.

Looking ahead, the investment environment remains challenging, with a wide range of uncertainties affecting equity prices, including global shifts in monetary policy and elevated geopolitical tensions. The portfolio managers believe the fund's flexibility in seeking investments around the world will provide significant opportunities in these conditions. They remain confident that on-the-ground research, a cornerstone of their investment process, will provide highly differentiated investment insights leading to potentially superior outcomes over the long term.

Growth-Income Fund returned 26.47% for the 12 months ended December 31, 2023, compared with a return of 26.29% in its benchmark index, S&P 500 Index,¹ a market capitalization-weighted index based on the results of approximately 500 widely held common stocks.

U.S. equities advanced amid strong economic growth, moderating inflation and a slowdown in the pace of U.S. Federal Reserve interest rate hikes despite market jitters over a major banking crisis and wars in Ukraine and the Middle East. The information technology, consumer discretionary and communication services sectors led as growth stocks significantly outpaced value. A strong labor market and resilient consumer spending helped the U.S. economy avoid a recession, which once seemed inevitable, and inflation declined rapidly throughout the year.

Regarding the fund, investments within the health care and financials sectors were top contributors to the fund's relative returns.² Larger-than-benchmark positions in Broadcom and General Electric were top individual contributors, as these stocks outpaced the market overall. On the downside, sector selection in the information technology and consumer discretionary sectors dragged on portfolio returns. Smaller-than-benchmark positions in Apple and NVIDIA detracted.

Looking ahead, the fund's managers take an overall positive view of economic indicators for the coming year. Inflation has declined meaningfully, although it remains above the Federal Reserve's target. Likewise, the Fed has paused its recent pattern of interest rate hikes and the U.S. economy has remained incredibly resilient throughout. Whether and when the pause will pivot to rate cuts is likely dependent on how quickly inflation reaches a level the central bank is comfortable with, but the idea of a soft landing seems far more realistic than a year ago. As a result, portfolio managers believe the outlook is positive for corporate earnings to improve and for stocks to move higher as a result. They will continue to build positions in companies and stocks in which they see long-term value potential.

International Growth and Income Fund returned 16.08% for the 12 months ended December 31, 2023, compared with a return of 15.62% for its benchmark index, MSCI ACWI (All Country World Index) ex USA,¹ a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes excluding the U.S.).

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI ex USA, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Regarding the fund, stock selection within the industrials and information technology sectors were additive to relative results.² Within individual securities, Danish biopharmaceutical firm Novo Nordisk was a top contributor due to returns that outpaced the broader market. On the downside, security selection within the financials and consumer staples sectors detracted from returns. Positions in British American Tobacco and China-based personal financial services provider Ping An Insurance were among the top individual detractors.

The new year looks to continue current macroeconomic uncertainty and trends stemming from shifting monetary policies and geopolitical tensions around the world. In this environment, the fund's managers continue to focus on businesses they believe will provide good value over the long-term, as guided by the fundamental, global research that underpins investment decisions.

Capital Income Builder®

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Capital Income Builder, which invests in a mix of stocks and bonds, returned 9.28% for the 12 months ended December 31, 2023. During the same period, the index blend of 70%/30% MSCI ACWI (All Country World Index)/Bloomberg U.S. Aggregate Index¹ advanced 17.06%. MSCI ACWI,² a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), returned 22.20%. The Bloomberg U.S. Aggregate Index,³ which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 5.53%.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Bond markets also rebounded, rallying on expectations that the U.S. Federal Reserve, the European Central Bank and others are not only done with rate hikes but planning rate cuts in 2024. Virtually all segments of the bond market generated strong returns in contrast to the severe 2022 downturn.

In the equity portfolio, stock selection in the financials sector was a top contributor to relative returns.⁴ On the downside, a smaller-than-benchmark position in the information technology sector was among the largest detractors from returns.

Sector and security selection was additive to relative returns overall in the fund's fixed income portfolio, while duration and curve positioning detracted.

While the likelihood of recession may have diminished for now, the fund's managers are mindful that downside risks remain prevalent. Slowing growth, softening labor markets, rising geopolitical tensions and the 2024 U.S. presidential election all have the potential to impact markets. The managers are cautious about weakening economic activity as the Fed has aggressively raised interest rates and continues to reduce its balance sheet. The fund is well-positioned to use its geographic flexibility to pursue dividend-paying investment opportunities around the world. Fund managers will continue to adhere to the fund's two primary objectives, which are (1) to seek to provide a level of current income that exceeds the average yield on U.S. stocks generally and (2) to provide a growing stream of income over the years. The fund's secondary objective is to provide growth of capital. This approach may have the potential to generate equity-like returns with relatively less volatility than global markets. The fund's managers remain optimistic about the companies with growing dividends that were selected for this portfolio through fundamental, bottom-up security selection.

Asset Allocation Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

Asset Allocation Fund, which is a mix of stocks and bonds, returned 14.55% for the 12 months ended December 31, 2023. During the same period, the index blend of 60%/40% S&P 500 Index/Bloomberg U.S. Aggregate Index¹ advanced 17.67%. S&P 500 Index,² a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, climbed 26.29%, while the Bloomberg U.S. Aggregate Index,³ which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 5.53%.

U.S. equities advanced amid strong economic growth, moderating inflation and a slowdown in the pace of U.S. Federal Reserve interest rate hikes despite market jitters over a major banking crisis and wars in Ukraine and the Middle East. The information technology, consumer discretionary and communication services sectors led as growth stocks significantly outpaced value.

Bond markets also rebounded, rallying on expectations that the U.S. Federal Reserve, the European Central Bank and others are not only done with rate hikes but planning rate cuts in 2024. Virtually all segments of the bond market generated strong returns in contrast to the severe 2022 downturn.

In the equity portfolio, investment selection within the energy and communication services sectors were among the top contributors to returns relative to the S&P 500 Index. Results were helped by holdings in Broadcom, which saw returns over the period that outpaced the broader equity market as falling interest rate expectations raised hopes of an overall improvement in global demand for electronics products. On the downside, a smaller-than-benchmark weight in the information technology sector and stock selection within the consumer discretionary sector weighed on relative returns. The portfolio's lower-than-benchmark holding in Apple also detracted.

Overall, the fund's fixed income investments were additive to returns relative to the Bloomberg U.S. Aggregate Index. Sector and security selection contributed positively to results, while duration⁴ and curve⁵ positioning detracted. Out-of-benchmark positions within U.S. Treasury Inflation-Protected Securities (TIPS) and high-yield bonds also added to returns. Derivatives, which are used as tools for implementing the portfolio's duration, curve and credit positioning, detracted from results.

The growth outlook is more benign heading into 2024, but the fund's managers remain cautious. In the wake of the strong stock market returns of 2023, stock markets may not be as strong in 2024. Fund managers remain focused on differentiating between companies whose fundamental outlook has changed versus those facing more transient issues, and where valuations are attractive. In addition, their portfolios are balanced across a broad array of cyclical and market exposures.

American Funds Global Balanced Fund returned 14.05% for the 12 months ended December 31, 2023. Over the same period, the fund's index blend of 60%/40% MSCI ACWI (All Country World Index)/Bloomberg Global Aggregate Index¹ rose 15.43%. MSCI ACWI,² a free float-adjusted market capitalization-weighted index that is designed to measure equity market results in the global developed and emerging markets (consisting of more than 40 developed and emerging market country indexes), returned 22.20%, while the Bloomberg Global Aggregate Index,³ a measure of global investment-grade bonds (rated BBB/Baa and above), returned 5.72%.

Global stocks rallied, bouncing back from the severe losses of 2022. Stocks advanced in nearly all major developed markets, led by the U.S., Europe and Japan. Many emerging markets also posted solid gains, particularly Brazil and India, even as stocks in China fell sharply. Markets moved higher despite rising geopolitical risks, including ongoing conflicts in Ukraine and the Middle East.

All sectors rose in the MSCI ACWI, boosted by signs of falling inflation and indications that many of the world's central banks may be done raising interest rates. Information technology stocks enjoyed the largest gains, fueled in part by rapid advancements in artificial intelligence. Consumer staples, health care and utilities stocks lagged the overall market.

Bonds markets also rebounded, rallying on expectations that the U.S. Federal Reserve, the European Central Bank and others are not only done with rate hikes but planning rate cuts in 2024. Virtually all segments of the bond market generated strong returns in contrast to the severe 2022 downturn.

Within the equity portfolio of the fund, stock selection in the materials and energy sectors were among the top contributors to returns relative to the MSCI ACWI. Within individual securities, Broadcom was a top contributor due to returns that outpaced the global equity market. On the downside, stock selection within the financials sector weighed on returns. A lower-than-benchmark holding in Apple was a top detractor. The fund's fixed income investments were additive to returns relative to the Bloomberg Global Aggregate Index. Duration⁴ positioning was the top contributor to relative returns, and overall sector selection was also positive. Security selection detracted modestly from relative returns.

Fund managers view the year ahead as having a combination of promising possibilities intertwined with lingering economic and geopolitical uncertainties. Encouragingly, some inflation data is suggestive of tempering price and cost pressures and, correspondingly, interest rates have also moderated from recent highs. Among stock sectors, fund managers continue to find attractive investment opportunities as renewable energy incentives and demographic changes are expected to aid growth. The fund's fixed income portfolio's positioning remains modestly cautious given the current geopolitical environment, but managers are confident in the opportunities available in bond markets that are now delivering meaningful income. As always, managers continue to focus on core principles of global research, individual security selection and bottom-up fundamental analysis to underpin investment decisions.

The Bond Fund of America rose 5.21% for the 12 months ended December 31, 2023. The fund's benchmark, Bloomberg U.S. Aggregate Index,¹ which represents the U.S. investment-grade (rated BBB/Baa and above) fixed-rate bond market, returned 5.53%.

U.S. bond markets exhibited great volatility in 2023. The U.S. 10-year Treasury yield started the year at 3.9%, fell to 3.3% in April, rose to 5.0% in October, and then rebounded strongly to end the year close to where it started at 3.9%. The shape of the U.S. yield curve² was also quite volatile as the two-year to 10-year curve flattened multiple times to multi-decade-record inverted levels, then it steepened in the second half of the year to end the year modestly inverted by -37 basis points (bps). All major U.S. fixed income sectors posted positive total returns.

Over the period, sector selection was the largest contributor to results with the most significant returns coming from active positions in high yield, mortgage-backed securities (MBS), investment grade corporates and emerging markets. Security selection was also a modest contributor with the majority of gains coming from investments in the investment grade corporate, securitized credit and emerging market sectors.

On the downside, positioning for a steeper yield curve was the largest detractor from returns relative to the index as the modest steepening of the yield curve over the course of the year was not enough to overcome the negative income drag associated with the position. Duration³ positioning was also a modest detractor from relative returns over the period. Derivatives, which are used as tools for implementing the portfolio's duration, curve and credit positioning, therefore also detracted from results.

While the market experienced great volatility in 2023, two broad themes remained in place - slowing economic growth and decelerating inflation. This should continue to lead to positive outcomes for both duration and credit, and may be magnified as managers expect significant allocations to core bond funds in 2024. While the likelihood of recession may have diminished for now, managers are mindful that downside risks remain prevalent. Managers are concentrating the fund's duration position at the shorter end of the rate curve (two-year to seven-year), which should benefit from expected Fed cuts in 2024. Managers are underweighting the long end of the curve (10-year to 30-year), which is less likely to benefit from rate cuts and could be negatively affected by elevated U.S. Treasury issuance to fund sustained high government deficits.

As valuations for risky assets like corporate bonds continue to move higher, managers will continue to harvest gains where possible and reinvest in higher-quality sectors and securities like AAA structured credit and agency MBS that have similar upside potential but should be more resilient if an unexpected shock emerges in 2024. In addition, managers expect that research-driven security selection will be an important contributor to results over the course of the year.

Capital World Bond Fund rose 6.39% for the 12 months ended December 31, 2023. The fund's benchmark, the Bloomberg Global Aggregate Index,¹ which measures global investment-grade bonds (rated BBB/Baa and above), returned 5.72%.

Bonds markets rebounded in 2023, rallying on expectations that the U.S. Federal Reserve, the European Central Bank and others are not only done with rate hikes but planning rate cuts in 2024. Virtually all segments of the bond market generated strong returns in contrast to the severe 2022 downturn.

Over the period, the largest contributions to the fund's relative returns² were duration³ positioning and sector selection, with a modest boost from security selection. Overall currency positioning was a modest detractor from comparative returns, due to the impact of currency hedging. An off-benchmark allocation to Brazilian sovereign bonds contributed meaningfully to relative returns, as did greater-than-benchmark holdings in Mexican and German sovereign bonds. On the downside, less-than-benchmark allocations to uniform mortgage-backed securities and U.S. Treasuries detracted from relative results.

Looking ahead, slowing inflation across many countries should allow global rates to move lower over the medium term. The fund's managers believe U.S. economic growth may persist at a slower pace, while economic outcomes across other parts of the developed world may be more mixed. The outlook for emerging markets is reasonably constructive, supported by the somewhat unexpected dovish tilt by the Fed in late 2023. Many economies are headed into an election cycle in 2024, which could lead to an increase in the potential for policy direction changes as well as an uptick in market volatility. The overall uncertainty of the macro backdrop combined with somewhat tight valuations across credit sectors leads the fund's managers to prefer modestly cautious positioning in the portfolio.

American High-Income Trust[®]

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

American High-Income Trust rose 12.69% for the 12 months ended December 31, 2023. In comparison, the fund's benchmark, the Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index,¹ which measures fixed-rate non-investment-grade bonds (rated BB/Ba and below) and limits the exposure of an issuer to 2%, returned 13.44%.

U.S. bond markets rebounded strongly. The U.S. Treasury yield curve² steepened modestly as the two-year yield fell 18 bps to end at 4.25% while the 10-year yield ended unchanged at 3.88%. All major U.S. fixed income sectors posted positive returns.

At a high level, while overall security selection detracted from the fund's relative returns³ over the period, investments within the energy and communications sectors contributed positively to relative results. On the downside, security selection within the cyclical and non-cyclical consumer goods sectors detracted from relative results.

With high-yield bond yields close to their long-term average, markets now reflect the somewhat higher inflation expectations and higher real interest rates that emerged over the last year. The substantial yield increases across fixed income markets over the last two years provides a more attractive forward return outlook, and although yields may continue to adjust to higher levels, the potential for higher or lower yields is now more balanced. The fund's managers continue to seek attractive opportunities within the high yield market that appropriately compensate for the underlying investment risks.

American Funds Mortgage Fund returned 4.03% for the 12 months ended December 31, 2023. Its benchmark index, Bloomberg U.S. Mortgage-Backed Securities Index,¹ which covers the mortgage-backed pass-through securities of Ginnie Mae, Fannie Mae and Freddie Mac, rose 5.05%.

U.S. bond markets rebounded strongly. The U.S. Treasury yield curve² steepened modestly as the two-year yield fell 18 bps to end at 4.25% while the 10-year yield ended unchanged at 3.88%. All major U.S. fixed income sectors posted positive returns.

Regarding the fund, curve positioning weighed on results overall and sector and security selection only contributed modestly either positively or negatively to results. Derivatives, which are used as tools for implementing the portfolio's duration³ and curve positioning, collectively detracted from results as U.S. Treasury futures were used to implement the fund's curve exposure.

The fund's focus remains on meeting its core objectives of providing current income and preserving invested capital. Managers are mindful of the fund's correlation to equity and its use as a building block in investor portfolios. They are cautious about weakening economic activity as the U.S. Federal Reserve has aggressively raised interest rates and continues to reduce its balance sheet. The fund is positioned with the view that inflation will continue to come down rapidly toward the Fed's target and that a contraction in growth is likely sometime in the next year.

Ultra-Short Bond Fund returned 4.94% for the 12 months ended December 31, 2023, compared with a 5.19% rise in the Bloomberg Short-Term Government/Corporate Index,¹ which consists of investment-grade (rated BBB/Baa and above), fixed-rate, publicly placed, dollar-denominated and non-convertible securities with remaining maturity from one up to (but not including) 12 months within either the government or corporate sector.

With a focus on capital preservation and liquidity, the fund continues to invest in a conservative manner, typically investing in both shorter duration² and higher quality securities relative to the index. This approach benefited the fund during the first half of the year with the U.S. Federal Reserve raising its benchmark rate by 25 basis points four times through July. The benchmark rate remained unchanged for the rest of 2023.

Short-term interest rates are now at a 23-year high following 11 total hikes over the last two years. With inflation declining throughout the year and now close to the Fed's target, market expectations indicate the Fed's benchmark rate is at or near its peak, and rate cuts are a strong possibility for 2024.

U.S. Government Securities Fund[®]

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

U.S. Government Securities Fund returned 3.21% for the 12 months ended December 31, 2023. Its benchmark, the Bloomberg U.S. Government/Mortgage-Backed Securities Index,¹ which covers obligations issued by the U.S. Treasury and U.S. government agencies, returned 4.45%.

U.S. bond markets rebounded strongly. The U.S. Treasury yield curve² steepened modestly as the two-year yield fell 18 bps to end at 4.25% while the 10-year yield ended unchanged at 3.88%. All major U.S. fixed income sectors posted positive returns.

Regarding the fund, top contributors to returns relative to the benchmark were sector allocation decisions to mortgage-backed securities (MBS). On the downside, duration³ and curve positioning weighed on returns relative to the benchmark. Interest rate derivatives, which are used as tools for implementing the portfolio's duration and curve positioning, collectively detracted from results.

Over the last two years, the U.S. Federal Reserve has tightened monetary policy considerably and the rate of inflation has come down rapidly. Going forward, it is more likely the Fed will ease its policy as inflation approaches its 2% target. So far, the Fed's unwinding of massive monetary support has resulted in minimal disruptions to financial markets and the economy; however, we are more concerned about the outlook as the lagged impact of tighter monetary conditions on financial markets and the economy remain uncertain. The fund's managers intend to use all the tools at their disposal to navigate these volatile markets as they seek to protect and grow shareholder assets over time.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The investment adviser is currently waiving a portion of its management fee. This waiver will be in effect through at least May 1, 2024. The waiver may only be modified or terminated with the approval of the fund's board. Net expense ratios reflect the waiver, without which they would have been higher. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower. Visit capitalgroup.com/afis for more information. Expense ratios are as of the fund's prospectus dated May 1, 2024 (unaudited). Refer to the Financial Highlights table in this report for details.

Past results are not predictive of results in future periods.

Any market index shown is unmanaged and, therefore, has no expenses. Investors cannot invest directly in an index.

¹Source: Bloomberg Index Services Ltd. The indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. There have been periods when the fund has lagged the indexes.

²Yield curves plot interest rates of bonds of equal credit and different maturities. They include normal, inverted and flat. Normal curves point to economic expansion, and downward-sloping curves point to economic recession. (Source: Investopedia.com.)

³Duration measures a bond's or fixed income portfolio's price sensitivity to interest rate changes. Most often, when interest rates rise, the higher a bond's duration, the more its price will fall. (Source: Investopedia.com.)

Managed Risk Growth Fund

Fund results shown are for past periods and are not predictive of results for future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com/afis. For information about your insurance contract and month-end results, go to the website of the company that issued your contract.

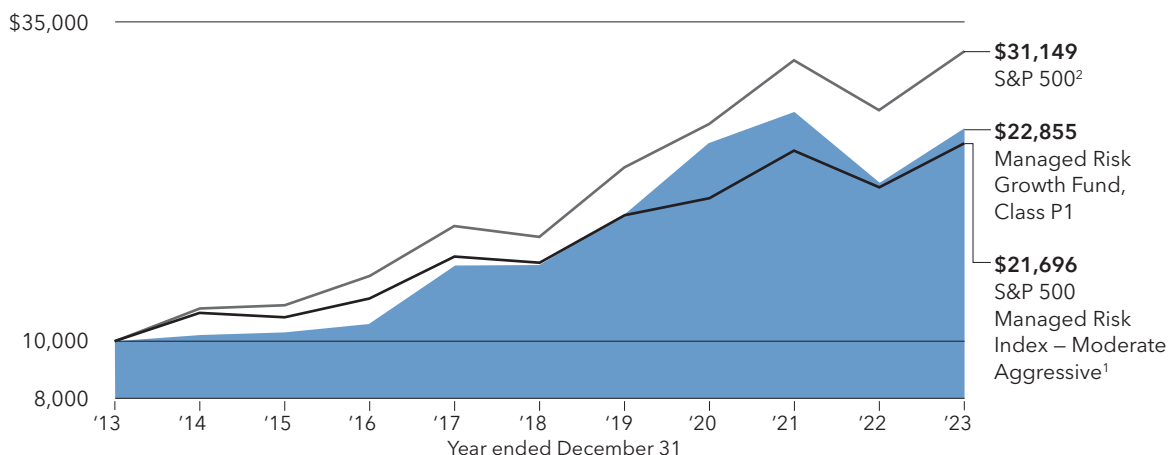

The fund returned 23.77% for the 12 months ended December 31, 2023. S&P 500 Managed Risk Index - Moderate Aggressive¹ advanced 18.69%. S&P 500 Index,² a market capitalization-weighted index based on the results of approximately 500 widely held common stocks, returned 26.29%.

The fund pursues its objective by investing in shares of American Funds Insurance Series® - Growth Fund and American Funds Insurance Series® - The Bond Fund of America while seeking to manage portfolio volatility and provide downside protection, primarily through the use of exchange-traded options and futures contracts. The benefit of the fund's managed risk strategy should be most apparent during periods of high volatility and in down markets. In steady or rising markets, the fund's results can be expected to lag those of the underlying fund.

The underlying Growth Fund's investments within the communication services and industrials sectors were the top contributors to relative returns.³ The return of the underlying The Bond Fund of America detracted slightly from relative results versus its primary benchmark, the Bloomberg U.S. Aggregate Index.⁴ The managed risk strategy, which is designed to help the fund during periods of high volatility, detracted from returns overall, though it helped reduce the volatility relative to its underlying non-managed risk portfolio. Within the strategy, the equity future overlay was the largest detractor while the U.S. Treasury future and option overlays moderately detracted.

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$19,320,000, which represented .25% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Value determined using significant unobservable inputs.

⁴Amount less than one thousand.

⁵Rate represents the seven-day yield at 12/31/2023.

⁶Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

Key to abbreviation(s)

ADR = American Depositary Receipts

CAD = Canadian dollars

CDI = CREST Depository Interest

GDR = Global Depositary Receipts

Refer to the notes to financial statements.

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$30,423,000, which represented .96% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Affiliate of the fund or part of the same "group of investment companies" as the fund, as defined under the Investment Company Act of 1940, as amended.

⁴Value determined using significant unobservable inputs.

⁵Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$28,940,000, which represented .91% of the net assets of the fund.

⁶Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$3,878,000, which represented .12% of the net assets of the fund.

⁷Rate represents the seven-day yield at 12/31/2023.

⁸Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

⁹Represents net activity. Refer to Note 5 for more information on securities lending.

¹⁰Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

¹¹Amount less than .01%.

Key to abbreviation(s)

ADR = American Depositary Receipts

REIT = Real Estate Investment Trust

SDR = Swedish Depositary Receipts

Refer to the notes to financial statements.

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$21,365,000, which represented .05% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Value determined using significant unobservable inputs.

⁴Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$155,539,000, which represented .40% of the net assets of the fund.

⁵Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.

⁶Amount less than one thousand.

⁷Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$5,508,000, which represented .01% of the net assets of the fund.

⁸Rate represents the seven-day yield at 12/31/2023.

⁹Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹⁰Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹¹Represents net activity. Refer to Note 5 for more information on securities lending.

¹²Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

¹³Amount less than .01%.

Key to abbreviation(s)

ADR = American Depositary Receipts

CAD = Canadian dollars

CDI = CREST Depository Interest

USD = U.S. dollars

Refer to the notes to financial statements.

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$82,000, which represented less than 0.01% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Value determined using significant unobservable inputs.

⁴Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$41,252,000, which represented .57% of the net assets of the fund.

⁵Amount less than one thousand.

⁶Rate represents the seven-day yield at 12/31/2023.

⁷Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

⁸Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

⁹Represents net activity. Refer to Note 5 for more information on securities lending.

¹⁰Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

¹¹Amount less than .01%.

Key to abbreviation(s)

ADR = American Depositary Receipts

CAD = Canadian dollars

CDI = CREST Depositary Interest

EUR = Euros

GBP = British pounds

Refer to the notes to financial statements.

New World Fund (continued)

¹Security did not produce income during the last 12 months.

²Value determined using significant unobservable inputs.

³Amount less than one thousand.

⁴Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$7,931,000, which represented .23% of the net assets of the fund.

⁵All or a portion of this security was on loan. The total value of all such securities was \$1,705,000, which represented .05% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

⁶Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$11,746,000, which represented .35% of the net assets of the fund.

⁷Step bond; coupon rate may change at a later date.

⁸Index-linked bond whose principal amount moves with a government price index.

⁹Scheduled interest and/or principal payment was not received.

¹⁰Rate represents the seven-day yield at 12/31/2023.

¹¹Affiliate of the fund or part of the same "group of investment companies" as the fund, as defined under the Investment Company Act of 1940, as amended.

¹²Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹³Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹⁴Represents net activity. Refer to Note 5 for more information on securities lending.

¹⁵Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

¹⁶Amount less than .01%.

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$10,510,000, which represented .10% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Rate represents the seven-day yield at 12/31/2023.

⁴Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

⁵Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

⁶Represents net activity. Refer to Note 5 for more information on securities lending.

⁷Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviation(s)

ADR = American Depositary Receipts

REIT = Real Estate Investment Trust

Refer to the notes to financial statements.

¹Security did not produce income during the last 12 months.

²Value determined using significant unobservable inputs.

³Amount less than one thousand.

⁴All or a portion of this security was on loan. The total value of all such securities was \$7,091,000, which represented .38% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

⁵Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$14,882,000, which represented .80% of the net assets of the fund.

⁶Step bond; coupon rate may change at a later date.

⁷Rate represents the seven-day yield at 12/31/2023.

⁸Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

⁹Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹⁰Represents net activity. Refer to Note 5 for more information on securities lending.

¹¹Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviation(s)

ADR = American Depositary Receipts

CAD = Canadian dollars

CDI = CREST Depository Interest

GBP = British pounds

REIT = Real Estate Investment Trust

SDR = Swedish Depositary Receipts

USD = U.S. dollars

Refer to the notes to financial statements.

Growth-Income Fund (continued)

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$110,228,000, which represented .29% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Rate represents the seven-day yield at 12/31/2023.

⁴Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

⁵Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

⁶Represents net activity. Refer to Note 5 for more information on securities lending.

⁷Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Key to abbreviation(s)

ADR = American Depositary Receipts

CAD = Canadian dollars

REIT = Real Estate Investment Trust

USD = U.S. dollars

Refer to the notes to financial statements.

¹Value determined using significant unobservable inputs.

²Amount less than one thousand.

³Security did not produce income during the last 12 months.

⁴All or a portion of this security was on loan. The total value of all such securities was \$2,296,000, which represented .70% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

⁵Rate represents the seven-day yield at 12/31/2023.

⁶Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

⁷Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

Key to abbreviation(s)

ADR = American Depositary Receipts

BRL = Brazilian reais

CAD = Canadian dollars

REIT = Real Estate Investment Trust

Refer to the notes to financial statements.

¹All or a portion of this security was on loan. The total value of all such securities was \$17,090,000, which represented 1.37% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

²Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$22,845,000, which represented 1.83% of the net assets of the fund.

³Value determined using significant unobservable inputs.

⁴Amount less than one thousand.

⁵Security did not produce income during the last 12 months.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁷Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁸Purchased on a TBA basis.

⁹Step bond; coupon rate may change at a later date.

¹⁰All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$2,208,000, which represented .18% of the net assets of the fund.

¹¹Index-linked bond whose principal amount moves with a government price index.

¹²Scheduled interest and/or principal payment was not received.

¹³Securities referencing LIBOR are expected to transition to an alternative reference rate by the security's next scheduled coupon reset date.

¹⁴Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹⁵Rate represents the seven-day yield at 12/31/2023.

¹⁶Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹⁷The maximum potential amount the fund may pay as a protection seller should a credit event occur.

¹⁸The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

¹⁹Represents net activity. Refer to Note 5 for more information on securities lending.

²⁰Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.

Asset Allocation Fund (continued)

- ¹Security did not produce income during the last 12 months.
- ²Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$1,274,651,000, which represented 4.96% of the net assets of the fund.
- ³Value determined using significant unobservable inputs.
- ⁴Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$66,644,000, which represented .26% of the net assets of the fund.
- ⁵All or a portion of this security was on loan. The total value of all such securities was \$24,156,000, which represented .09% of the net assets of the fund. Refer to Note 5 for more information on securities lending.
- ⁶Amount less than one thousand.
- ⁷Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.
- ⁸Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.
- ⁹Purchased on a TBA basis.
- ¹⁰Step bond; coupon rate may change at a later date.
- ¹¹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$19,019,000, which represented .07% of the net assets of the fund.
- ¹²Index-linked bond whose principal amount moves with a government price index.
- ¹³Securities referencing LIBOR are expected to transition to an alternative reference rate by the security's next scheduled coupon reset date.
- ¹⁴Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.
- ¹⁵Scheduled interest and/or principal payment was not received.
- ¹⁶Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$34,605,000, which represented .13% of the net assets of the fund.
- ¹⁷Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.
- ¹⁸Rate represents the seven-day yield at 12/31/2023.
- ¹⁹Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.
- ²⁰The maximum potential amount the fund may pay as a protection seller should a credit event occur.
- ²¹The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.
- ²²Represents net activity. Refer to Note 5 for more information on securities lending.
- ²³Dividend income is included with securities lending income in the fund's statement of operations and is not shown in this table.
- ²⁴Amount less than .01%.

American Funds Global Balanced Fund (continued)

¹Security did not produce income during the last 12 months.

²All or a portion of this security was on loan. The total value of all such securities was \$1,039,000, which represented .27% of the net assets of the fund. Refer to Note 5 for more information on securities lending.

³Index-linked bond whose principal amount moves with a government price index.

⁴Scheduled interest and/or principal payment was not received.

⁵Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$17,573,000, which represented 4.52% of the net assets of the fund.

⁶Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁷Purchased on a TBA basis.

⁸Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$860,000, which represented .22% of the net assets of the fund.

¹⁰Step bond; coupon rate may change at a later date.

¹¹Securities referencing LIBOR are expected to transition to an alternative reference rate by the security's next scheduled coupon reset date.

¹²Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹³Rate represents the seven-day yield at 12/31/2023.

¹⁴Security purchased with cash collateral from securities on loan. Refer to Note 5 for more information on securities lending.

¹⁵Amount less than one thousand.

¹⁶The maximum potential amount the fund may pay as a protection seller should a credit event occur.

¹⁷The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

The Bond Fund of America (continued)

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

³Amount less than one thousand.

⁴Purchased on a TBA basis.

⁵Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$1,427,458,000, which represented 12.97% of the net assets of the fund.

⁶Step bond; coupon rate may change at a later date.

⁷Value determined using significant unobservable inputs.

⁸Securities referencing LIBOR are expected to transition to an alternative reference rate by the security's next scheduled coupon reset date.

⁹Scheduled interest and/or principal payment was not received.

¹⁰All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$63,649,000, which represented .58% of the net assets of the fund.

¹¹Index-linked bond whose principal amount moves with a government price index.

¹²Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$1,159,000, which represented .01% of the net assets of the fund.

¹³Security did not produce income during the last 12 months.

¹⁴Rate represents the seven-day yield at 12/31/2023.

¹⁵Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹⁶Amount less than .01%.

Total		<u>\$18,867</u>	<u>\$18,398</u>	<u>1.19%</u>

¹Step bond; coupon rate may change at a later date.

²Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$18,398,000, which represented 1.19% of the net assets of the fund.

³Scheduled interest and/or principal payment was not received.

⁴Index-linked bond whose principal amount moves with a government price index.

⁵Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

⁶Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$109,560,000, which represented 7.11% of the net assets of the fund.

⁷Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.

⁸Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$1,802,000, which represented .12% of the net assets of the fund.

⁹Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

¹⁰Purchased on a TBA basis.

¹¹Amount less than one thousand.

¹²Value determined using significant unobservable inputs.

¹³All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$12,774,000, which represented .83% of the net assets of the fund.

¹⁴Security did not produce income during the last 12 months.

¹⁵Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

¹⁶Rate represents the seven-day yield at 12/31/2023.

¹⁷The maximum potential amount the fund may pay as a protection seller should a credit event occur.

¹⁸The prices and resulting values for credit default swap indices serve as an indicator of the current status of the payment/performance risk. As the value of a sell protection credit default swap increases or decreases, when compared to the notional amount of the swap, the payment/performance risk may decrease or increase, respectively.

¹⁹Amount less than .01%.

American High-Income Trust (continued)

¹Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$584,486,000, which represented 66.89% of the net assets of the fund.

²Payment in kind; the issuer has the option of paying additional securities in lieu of cash. Payment methods and rates are as of the most recent payment when available.

³Value determined using significant unobservable inputs.

⁴Scheduled interest and/or principal payment was not received.

⁵Loan participations and assignments; may be subject to legal or contractual restrictions on resale. The total value of all such loans was \$35,694,000, which represented 4.08% of the net assets of the fund.

⁶Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available.

⁷Step bond; coupon rate may change at a later date.

⁸Amount less than one thousand.

⁹Restricted security, other than Rule 144A securities or commercial paper issued pursuant to Section 4(a)(2) of the Securities Act of 1933. The total value of all such restricted securities was \$30,475,000, which represented 3.49% of the net assets of the fund.

¹⁰Securities referencing LIBOR are expected to transition to an alternative reference rate by the security's next scheduled coupon reset date.

¹¹All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$539,000, which represented .06% of the net assets of the fund.

¹²Security did not produce income during the last 12 months.

¹³Rate represents the seven-day yield at 12/31/2023.

¹⁴Part of the same "group of investment companies" as the fund as defined under the Investment Company Act of 1940, as amended.

Key to abbreviation(s)

CME = CME Group

DAC = Designated Activity Company

LIBOR = London Interbank Offered Rate

PIK = Payment In Kind

REIT = Real Estate Investment Trust

SOFR = Secured Overnight Financing Rate

USD = U.S. dollars

American Funds Mortgage Fund (continued)

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Amount less than one thousand.

³Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.

⁴All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$929,000, which represented .86% of the net assets of the fund.

⁵Purchased on a TBA basis.

⁶Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$16,052,000, which represented 14.89% of the net assets of the fund.

⁷Step bond; coupon rate may change at a later date.

⁸Index-linked bond whose principal amount moves with a government price index.

Key to abbreviation(s)

Assn. = Association

CME = CME Group

EFFR = Effective Federal Funds Rate

SOFR = Secured Overnight Financing Rate

TBA = To be announced

USD = U.S. dollars

¹Principal payments may be made periodically. Therefore, the effective maturity date may be earlier than the stated maturity date.

²Amount less than one thousand.

³Coupon rate may change periodically. Reference rate and spread are as of the most recent information available. Some coupon rates are determined by the issuer or agent based on current market conditions; therefore, the reference rate and spread are not available. For short-term securities, the date of the next scheduled coupon rate change is considered to be the maturity date.

⁴Purchased on a TBA basis.

⁵All or a portion of this security was pledged as collateral. The total value of pledged collateral was \$11,225,000, which represented .74% of the net assets of the fund.

⁶Index-linked bond whose principal amount moves with a government price index.

⁷Acquired in a transaction exempt from registration under Rule 144A or, for commercial paper, Section 4(a)(2) of the Securities Act of 1933. May be resold in the U.S. in transactions exempt from registration, normally to qualified institutional buyers. The total value of all such securities was \$171,631,000, which represented 11.26% of the net assets of the fund.

Key to abbreviation(s)

Assn. = Association

EFFR = Effective Federal Funds Rate

SOFR = Secured Overnight Financing Rate

TBA = To be announced

USD = U.S. dollars

Refer to the notes to financial statements.

Notes to financial statements

1. Organization

American Funds Insurance Series (the “series”) is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end, diversified management investment company with 40 different funds (“the funds”), including 23 funds in the series covered in this report. The other 17 funds in the series are covered in separate reports. Twelve funds in the series are covered in the American Funds Insurance Series - Target Date Series report and five funds in the series are covered in the American Funds Insurance Series - Portfolio Series report. The assets of each fund are segregated, with each fund accounted for separately. Capital Research and Management Company (“CRMC”) is the series’ investment adviser. Milliman Financial Risk Management LLC (“Milliman FRM”) is the subadviser for the risk management strategy for eight of the funds (the “managed risk funds”), five of which are covered in this report.

The managed risk funds covered in this report are Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Washington Mutual Investors Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund. The managed risk funds invest in other funds within the series (the “underlying funds”) and employ Milliman FRM to implement the risk management strategy, which consists of using hedging instruments – primarily exchange-traded options and futures contracts – to attempt to stabilize the volatility of the funds around target volatility levels and reduce the downside exposure of the funds during periods of significant market declines.

Shareholders approved a proposal to reorganize the series from a Massachusetts business trust to a Delaware statutory trust. The series reserved the right to delay implementing the reorganization and has elected to do so.

The investment objective(s) for each fund covered in this report are as follows:

Global Growth Fund – To provide long-term growth of capital.

Global Small Capitalization Fund – To provide long-term growth of capital.

Growth Fund – To provide growth of capital.

International Fund – To provide long-term growth of capital.

New World Fund – To provide long-term capital appreciation.

Washington Mutual Investors Fund – To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing.

Capital World Growth and Income Fund – To provide long-term growth of capital while providing current income.

Growth-Income Fund – To achieve long-term growth of capital and income.

International Growth and Income Fund – To provide long-term growth of capital while providing current income.

Capital Income Builder – The two primary objectives are (1) to provide a level of current income that exceeds the average yield on U.S. stocks generally and (2) to provide a growing stream of income over the years. The secondary objective is to provide growth of capital.

Asset Allocation Fund – To provide high total return (including income and capital gains) consistent with preservation of capital over the long term.

American Funds Global Balanced Fund – Seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income.

The Bond Fund of America – To provide as high a level of current income as is consistent with the preservation of capital.

Capital World Bond Fund – To provide, over the long term, a high level of total return consistent with prudent investment management.

American High-Income Trust – The primary objective is to provide a high level of current income. The secondary objective is capital appreciation.

American Funds Mortgage Fund – To provide current income and preservation of capital.

Ultra-Short Bond Fund – To provide current income, consistent with the maturity and quality standards applicable to the fund, and preservation of capital and liquidity.

U.S. Government Securities Fund – To provide a high level of current income consistent with prudent investment risk and preservation of capital.

Managed Risk Growth Fund – To provide growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk International Fund – To provide long-term growth of capital while seeking to manage volatility and provide downside protection.

Managed Risk Washington Mutual Investors Fund – To produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common stock investing, in each case while seeking to manage volatility and provide downside protection.

Managed Risk Growth-Income Fund – To achieve long-term growth of capital and income while seeking to manage volatility and provide downside protection.

Managed Risk Asset Allocation Fund – To provide high total return (including income and capital gains) consistent with preservation of capital over the long term while seeking to manage volatility and provide downside protection.

Each fund in the series, except the managed risk funds, offers either four or five share classes (Classes 1, 1A, 2, 3 or 4); the managed risk funds offer two share classes (Classes P1 and P2). Holders of all share classes of each fund have equal pro rata rights to assets, dividends and liquidation proceeds of each fund held. Each share class of each fund has identical voting rights, except for the exclusive right to vote on matters affecting only its class. Share classes have different fees and expenses (“class-specific fees and expenses”), primarily due to different arrangements for certain distribution expenses. Differences in class-specific fees and expenses will result in differences in net investment income and, therefore, the payment of different per-share dividends by each class of each fund.

2. Significant accounting policies

Each fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board. Each fund’s financial statements have been prepared to comply with U.S. generally accepted accounting principles (“U.S. GAAP”). These principles require the series’ investment adviser to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates. Subsequent events, if any, have been evaluated through the date of issuance in the preparation of the financial statements. The funds follow the significant accounting policies described in this section, as well as the valuation policies described in the next section on valuation.

Cash – Cash may include amounts held in an interest bearing deposit facility.

Security transactions and related investment income – Security transactions are recorded by each fund as of the date the trades are executed with brokers. Realized gains and losses from security transactions are determined based on the specific identified cost of the securities. In the event a security is purchased with a delayed payment date, each fund will segregate liquid assets sufficient to meet their payment obligations. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis. Market discounts, premiums and original issue discounts on fixed-income securities are amortized daily over the expected life of the security.

Fees and expenses – The fees and expenses of the underlying funds held by the managed risk funds are not included in the fees and expenses reported for each of the managed risk funds; however, they are indirectly reflected in the valuation of each of the underlying funds. These fees are included in the unaudited net effective expense ratios that are provided as additional information in the financial highlights tables.

Class allocations – Income, fees and expenses (other than class-specific fees and expenses), realized gains and losses and unrealized appreciation and depreciation are allocated daily among the various share classes of each fund based on their relative net assets. Class-specific fees and expenses, such as distribution expenses, are accrued daily and charged directly to the respective share class of each fund.

Distributions paid to shareholders – Income dividends and capital gain distributions are recorded on each fund’s ex-dividend date.

Currency translation – Assets and liabilities, including investment securities, denominated in currencies other than U.S. dollars are translated into U.S. dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investment securities and income and expenses are translated into U.S. dollars at the exchange rates on the dates of such transactions. The effects of changes in exchange rates on investment securities are included with the net realized gain or loss and net unrealized appreciation or depreciation on investments in the funds’ statements of operations. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than U.S. dollars are disclosed separately.

3. Valuation

CRMC, the series’ investment adviser, values the funds’ investments at fair value as defined by U.S. GAAP. The net asset value per share is calculated once daily as of the close of regular trading on the New York Stock Exchange, normally 4 p.m. New York time, each day the New York Stock Exchange is open.

Methods and inputs – The series’ investment adviser uses the following methods and inputs to establish the fair value of each fund’s assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities, including depositary receipts, are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market on which the security trades. The value of an underlying fund is based on its reported net asset value.

Fixed-income securities, including short-term securities, are generally valued at evaluated prices obtained from third-party pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed-income securities in which the funds are authorized to invest. However, these classifications are not exclusive and any of the inputs may be used to value any other class of fixed-income security.

Fixed-income class	Examples of standard inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as “standard inputs”)
Corporate bonds, notes & loans; convertible securities	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities
Mortgage-backed; asset-backed obligations	Standard inputs and cash flows, prepayment information, default rates, delinquency and loss assumptions, collateral characteristics, credit enhancements and specific deal information
Municipal securities	Standard inputs and, for certain distressed securities, cash flows or liquidation values using a net present value calculation based on inputs that include, but are not limited to, financial statements and debt contracts

Securities with both fixed-income and equity characteristics, or equity securities traded principally among fixed-income dealers, are generally valued in the manner described for either equity or fixed-income securities, depending on which method is deemed most appropriate by the series' investment adviser. The Capital Group Central Corporate Bond Fund ("CCBF"), a fund within the Capital Group Central Fund Series II, and Capital Group Central Cash Fund ("CCF"), a fund within the Capital Group Central Fund Series (collectively the "Central Funds"), are each valued based upon a floating net asset value, which fluctuates with changes in the value of each fund's portfolio securities. The underlying securities are valued based on the policies and procedures in the Central Funds' statements of additional information. The State Street Institutional U.S. Government Money Market Fund held by the managed risk funds is managed to maintain a \$1.00 net asset value per share. The net asset value of each share class of each managed risk fund is calculated based on the reported net asset values of the underlying funds in which each fund invests.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures of the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued. Forward currency contracts are valued based on the spot and forward exchange rates obtained from a third-party pricing vendor. Swaps are generally valued using evaluated prices obtained from third-party pricing vendors who calculate these values based on market inputs that may include the yields of the indices referenced in the instrument and the relevant curve, dealer quotes, default probabilities and recovery rates, other reference data, and terms of the contract.

Securities and other assets for which representative market quotations are not readily available or are considered unreliable by the series' investment adviser are fair valued as determined in good faith under fair value guidelines adopted by the series' investment adviser and approved by the board of trustees as further described. The investment adviser follows fair valuation guidelines, consistent with U.S. Securities and Exchange Commission rules and guidance, to consider relevant principles and factors when making fair value determinations. The investment adviser considers relevant indications of value that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security, restrictions on resale of the security, relevant financial or business developments of the issuer, actively traded similar or related securities, dealer or broker quotes, conversion or exchange rights on the security, related corporate actions, significant events occurring after the close of trading in the security, and changes in overall market conditions. In addition, the closing prices of equity securities and futures that trade in markets outside U.S. time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each share class of each fund is determined. Fair valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

Processes and structure – The series' board of trustees has designated the series' investment adviser to make fair value determinations, subject to board oversight. The investment adviser has established a Joint Fair Valuation Committee (the "Committee") to administer, implement and oversee the fair valuation process, and to make fair value decisions. The Committee regularly reviews its own fair value decisions, as well as decisions made under its standing instructions to the investment adviser's valuation team. The Committee reviews changes in fair value measurements from period to period, pricing vendor information and market data, and may, as deemed appropriate, update the fair valuation guidelines to better reflect the results of back testing and address new or evolving issues. Pricing decisions, processes and controls over security valuation are also subject to additional internal reviews facilitated by the investment adviser's global risk management group. The Committee reports changes to the fair valuation guidelines to the board of trustees. The series' board and audit committee also regularly review reports that describe fair value determinations and methods.

Classifications – The series' investment adviser classifies the funds' assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside the U.S. may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the investment adviser's determination of assumptions that market participants might reasonably use in valuing the securities.

The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. For example, U.S. government securities are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market. The tables on the following pages present the funds' valuation levels as of December 31, 2023 (dollars in thousands):

The following table reconciles the valuation of the fund's Level 3 investment securities and related transactions for the year ended December 31, 2023 (dollars in thousands):

	Beginning value at 1/1/2023	Transfers into Level 3 ²	Purchases	Sales	Net realized loss ³	Unrealized appreciation ³	Transfers out of Level 3 ²	Ending value at 12/31/2023
Investment securities	\$34,480	\$457	\$13,803	\$(5,838)	\$(7,424)	\$6,257	\$(4,686)	\$37,049

Net unrealized depreciation during the period on Level 3 investment securities held at December 31, 2023 \$ (2,129)

²Transfers into or out of Level 3 are based on the beginning market value of the quarter in which they occurred. These transfers are the result of changes in the availability of pricing sources and/or in the observability of significant inputs used in valuing the securities.

³Net realized gain and unrealized depreciation are included in the related amounts on investments in the fund's statement of operations.

Unobservable inputs – Valuation of the fund’s Level 3 securities is based on significant unobservable inputs that reflect the investment adviser’s determination of assumptions that market participants might reasonably use in valuing the securities. The following table provides additional information used by the fund’s investment adviser to fair value the fund’s Level 3 securities (dollars in thousands):

	Value at 12/31/2023	Valuation techniques	Unobservable inputs	Range (if applicable)	Weighted average*	Impact to valuation from an increase in input†
Bonds, notes & other debt instruments	\$ 4,944	Estimated recovery value	Expected proceeds	Not applicable	Not applicable	Not applicable

Total	\$37,049					

*Weighted average is by relative fair value.

†This column represents the directional change in fair value of the Level 3 securities that would result in an increase from the corresponding input. Significant increases and decreases in these inputs in isolation could result in significantly higher or lower fair value measurements.

Key to abbreviations and symbols

CapEx = Capital expenditures

DLOM = Discount for lack of marketability

EBITDA = Earnings before income taxes, depreciation and amortization

EV = Enterprise value

Managed Risk Washington Mutual Investors Fund

As of December 31, 2023, all of the fund's investments were classified as Level 1.

Managed Risk Growth-Income Fund

As of December 31, 2023, all of the fund's investments were classified as Level 1.

Managed Risk Asset Allocation Fund

As of December 31, 2023, all of the fund's investments were classified as Level 1.

4. Risk factors

Investing in the funds may involve certain risks including, but not limited to, those described below.

Market conditions – The prices of, and the income generated by, the common stocks, bonds and other securities held by a fund may decline – sometimes rapidly or unpredictably – due to various factors, including events or conditions affecting the general economy or particular industries or companies; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; changes in inflation rates; and currency exchange rate, interest rate and commodity price fluctuations. These risks may be heightened in the case of smaller capitalization stocks.

Economies and financial markets throughout the world are highly interconnected. Economic, financial or political events, trading and tariff arrangements, wars, terrorism, cybersecurity events, natural disasters, public health emergencies (such as the spread of infectious disease), bank failures and other circumstances in one country or region, including actions taken by governmental or quasi-governmental authorities in response to any of the foregoing, could have impacts on global economies or markets. As a result, whether or not a fund invests in securities of issuers located in or with significant exposure to the countries affected, the value and liquidity of a fund's investments may be negatively affected by developments in other countries and regions.

Issuer risks – The prices of, and the income generated by, securities held by a fund may decline in response to various factors directly related to the issuers of such securities, including reduced demand for an issuer's goods or services, poor management performance, major litigation, investigations or other controversies related to the issuer, changes in the issuer's financial condition or credit rating, changes in government regulations affecting the issuer or its competitive environment and strategic initiatives such as mergers, acquisitions or dispositions and the market response to any such initiatives. An individual security may also be affected by factors relating to the industry or sector of the issuer or the securities markets as a whole, and conversely an industry or sector or the securities markets may be affected by a change in financial condition or other event affecting a single issuer.

Investing in income-oriented stocks – The value of a fund's securities and income provided by a fund may be reduced by changes in the dividend policies of, and the capital resources available for dividend payments at, the companies in which the fund invests.

Investing in growth-oriented stocks – Growth-oriented common stocks and other equity-type securities (such as preferred stocks, convertible preferred stocks and convertible bonds) may involve larger price swings and greater potential for loss than other types of investments. These risks may be even greater in the case of smaller capitalization stocks.

Investing in small companies – Investing in smaller companies may pose additional risks. For example, it is often more difficult to value or dispose of small company stocks and more difficult to obtain information about smaller companies than about larger companies. Furthermore, smaller companies often have limited product lines, operating histories, markets and/or financial resources, may be dependent on one or a few key persons for management, and can be more susceptible to losses. Moreover, the prices of their stocks may be more volatile than stocks of larger, more established companies, particularly during times of market turmoil.

Investing outside the U.S. – Securities of issuers domiciled outside the U.S. or with significant operations or revenues outside the U.S., and securities tied economically to countries outside the U.S., may lose value because of adverse political, social, economic or market developments (including social instability, regional conflicts, terrorism and war) in the countries or regions in which the issuers are domiciled, operate or generate revenue or to which the securities are tied economically. These securities may also lose value due to changes in foreign currency exchange rates against the U.S. dollar and/or currencies of other countries. Issuers of these securities may be more susceptible to actions of foreign governments, such as nationalization, currency blockage or the imposition of price controls, sanctions, or punitive taxes, each of which could adversely impact the value of these securities. Securities markets in certain countries may be more volatile and/or less liquid than those in the U.S. Investments outside the U.S. may also be subject to different regulatory, legal, accounting, auditing, financial reporting and recordkeeping requirements, and may be more difficult to value, than those in the U.S. In addition, the value of investments outside the U.S. may be reduced by foreign taxes, including foreign withholding taxes on interest and dividends. Further, there may be increased risks of delayed settlement of securities purchased or sold by the fund, which could impact the liquidity of the fund's portfolio. The risks of investing outside the U.S. may be heightened in connection with investments in emerging markets.

Investing in developing countries – Investing in countries with developing economies and/or markets may involve risks in addition to and greater than those generally associated with investing in developed countries. For instance, developing countries tend to have less developed political, economic and legal systems than those in developed countries. Accordingly, the governments of these countries may be less stable and more likely to intervene in the market economy, for example, by imposing capital controls, nationalizing a company or industry, placing restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or imposing punitive taxes that could adversely affect the prices of securities. Information regarding issuers in developing countries may be limited, incomplete or inaccurate, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which issuers in developed countries are subject. A fund's rights with respect to its investments in developing countries, if any, will generally be governed by local law, which may make it difficult or impossible for the fund to pursue legal remedies or to obtain and enforce judgments in local courts. In addition, the economies of these countries may be dependent on relatively few industries, may have limited access to capital and may be more susceptible to changes in local and global trade conditions and downturns in the world economy. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, more vulnerable to market manipulation, and more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, developing countries are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in emerging markets – Investing in emerging markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, emerging market countries tend to have less developed political, economic and legal systems than those in developed countries. Accordingly, the governments of these countries may be less stable and more likely to intervene in the market economy, for example, by imposing capital controls, nationalizing a company or industry, placing restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or imposing punitive taxes that could adversely affect the prices of securities. Information regarding issuers in emerging markets may be limited, incomplete or inaccurate, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which issuers in more developed markets are subject. A fund's rights with respect to its investments in emerging markets, if any, will generally be governed by local law, which may make it difficult or impossible for the fund to pursue legal remedies or to obtain and enforce judgments in local courts. In addition, the economies of these countries may be dependent on relatively few industries, may have limited access to capital and may be more susceptible to changes in local and global trade conditions and downturns in the world economy. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, more vulnerable to market manipulation, and more difficult to value, than securities issued in countries with more developed economies and/or markets. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating a fund's net asset value. Additionally, emerging markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Investing in debt instruments – The prices of, and the income generated by, bonds and other debt securities held by a fund may be affected by factors such as the interest rates, maturities and credit quality of these securities.

Rising interest rates will generally cause the prices of bonds and other debt securities to fall. Also, when interest rates rise, issuers of debt securities that may be prepaid at any time, such as mortgage-or other asset-backed securities, are less likely to refinance existing debt securities, causing the average life of such securities to extend. A general change in interest rates may cause investors to sell debt securities on a large scale, which could also adversely affect the price and liquidity of debt securities and could also result in increased redemptions from a fund. Falling interest rates may cause an issuer to redeem, call or refinance a debt security before its stated maturity, which may result in a fund having to reinvest the proceeds in lower yielding securities. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities.

Bonds and other debt securities are also subject to credit risk, which is the possibility that the credit strength of an issuer or guarantor will weaken or be perceived to be weaker, and/or an issuer of a debt security will fail to make timely payments of principal or interest and the security will go into default. Changes in actual or perceived creditworthiness may occur quickly. A downgrade or default affecting any of a fund's securities could cause the value of a fund's shares to decrease. Lower quality debt securities generally have higher rates of interest and may be subject to greater price fluctuations than higher quality debt securities. Credit risk is gauged, in part, by the credit ratings of the debt securities in which a fund invests. However, ratings are only the opinions of the rating agencies issuing them and are not guarantees as to credit quality or an evaluation of market risk. The fund's investment adviser relies on its own credit analysts to research issuers and issues in assessing credit and default risks.

Investing in lower rated debt instruments – Lower rated bonds and other lower rated debt securities generally have higher rates of interest and involve greater risk of default or price declines due to changes in the issuer's creditworthiness than those of higher quality debt securities. The market prices of these securities may fluctuate more than the prices of higher quality debt securities and may decline significantly in periods of general economic difficulty. These risks may be increased with respect to investments in junk bonds.

Investing in derivatives – The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds. Changes in the value of a derivative may not correlate perfectly with, and may be more sensitive to market events than, the underlying asset, rate or index, and a derivative instrument may cause a fund to lose significantly more than its initial investment. Derivatives may be difficult to value, difficult for a fund to buy or sell at an opportune time or price and difficult, or even impossible, to terminate or otherwise offset. A fund's use of derivatives may result in losses to the fund, and investing in derivatives may reduce a fund's returns and increase a fund's price volatility. A fund's counterparty to a derivative transaction (including, if applicable, the fund's clearing broker, the derivatives exchange or the clearinghouse) may be unable or unwilling to honor its financial obligations in respect of the transaction. In certain cases, the fund may be hindered or delayed in exercising remedies against or closing out derivative instruments with a counterparty, which may result in additional losses. Derivatives are also subject to operational risk (such as documentation issues, settlement issues and systems failures) and legal risk (such as insufficient documentation, insufficient capacity or authority of a counterparty, and issues with the legality or enforceability of a contract).

Currency – The prices of, and the income generated by, many debt securities held by a fund may also be affected by changes in relative currency values. If the U.S. dollar appreciates against foreign currencies, the value in U.S. dollars of a fund's securities denominated in such currencies would generally fall and vice versa.

Investing in mortgage-related and other asset-backed securities – Mortgage-related securities, such as mortgage-backed securities, and other asset-backed securities, include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as residential mortgage loans, home equity loans, mortgages on commercial buildings, consumer loans or receivables and equipment leases. While such securities are subject to the risks associated with investments in debt instruments generally (for example, credit, extension and interest rate risks), they are also subject to other and different risks. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt, potentially increasing the volatility of the securities and a fund's net asset value. When interest rates fall, borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in a fund having to reinvest the proceeds in lower yielding securities, effectively reducing a fund's income. Conversely, if interest rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing a fund's cash available for reinvestment in higher yielding securities. Mortgage-backed securities are also subject to the risk that underlying borrowers will be unable to meet their obligations and the value of property that secures the mortgages may decline in value and be insufficient, upon foreclosure, to repay the associated loans. Investments in asset-backed securities are subject to similar risks.

Investing in future delivery contracts – A fund may enter into contracts, such as to-be-announced contracts and mortgage dollar rolls, that involve a fund selling mortgage-related securities and simultaneously contracting to repurchase similar securities for delivery at a future date at a predetermined price. This can increase a fund's market exposure, and the market price of the securities that the fund contracts to repurchase could drop below their purchase price. While a fund can preserve and generate capital through the use of such contracts by, for example, realizing the difference between the sale price and the future purchase price, the income generated by the fund may be reduced by engaging in such transactions. In addition, these transactions increase the turnover rate of a fund.

Investing in inflation-linked bonds – The values of inflation-linked bonds generally fluctuate in response to changes in real interest rates – i.e., rates of interest after factoring in inflation. A rise in real interest rates may cause the prices of inflation-linked securities to fall, while a decline in real interest rates may cause the prices to increase. Inflation-linked bonds may experience greater losses than other debt securities with similar durations when real interest rates rise faster than nominal interest rates. There can be no assurance that the value of an inflation-linked security will be directly correlated to changes in interest rates; for example, if interest rates rise for reasons other than inflation, the increase may not be reflected in the security's inflation measure.

Investing in inflation-linked bonds may also reduce a fund's distributable income during periods of deflation. If prices for goods and services decline throughout the economy, the principal and income on inflation-linked securities may decline and result in losses to a fund.

Investing in securities backed by the U.S. government – Securities backed by the U.S. Treasury or the full faith and credit of the U.S. government are guaranteed only as to the timely payment of interest and principal when held to maturity. Accordingly, the current market values for these securities will fluctuate with changes in interest rates and the credit rating of the U.S. government. Notwithstanding that these securities are backed by the full faith and credit of the U.S. government, circumstances could arise that would prevent or delay the payment of interest or principal on these securities, which could adversely affect their value and cause the fund to suffer losses. Such an event could lead to significant disruptions in U.S. and global markets. Securities issued by U.S. government-sponsored entities and federal agencies and instrumentalities that are not backed by the full faith and credit of the U.S. government are neither issued nor guaranteed by the U.S. government. U.S. government securities are subject to market risk, interest rate risk and credit risk.

Investing in repurchase agreements – Upon entering into a repurchase agreement, a fund purchases a security from a bank or broker-dealer, which simultaneously commits to repurchase the security within a specified time at the fund's cost with interest. The security purchased by the fund constitutes collateral for the seller's repurchase obligation. If the party agreeing to repurchase should default, the fund may seek to sell the security it holds as collateral. The fund may incur a loss if the value of the collateral securing the repurchase obligation falls below the repurchase price. The fund may also incur disposition costs and encounter procedural delays in connection with liquidating the collateral.

Interest rate risk – The values and liquidity of the securities held by a fund may be affected by changing interest rates. For example, the values of these securities may decline when interest rates rise and increase when interest rates fall. Longer maturity debt securities generally have greater sensitivity to changes in interest rates and may be subject to greater price fluctuations than shorter maturity debt securities. A fund may invest in variable and floating rate securities. When a fund holds variable or floating rate securities, a decrease in market interest rates will adversely affect the income received from such securities and the net asset value of a fund's shares. Although the values of such securities are generally less sensitive to interest rate changes than those of other debt securities, the value of variable and floating rate securities may decline if their interest rates do not rise as quickly, or as much, as market interest rates. Conversely, floating rate securities will not generally increase in value if interest rates decline. During periods of extremely low short-term interest rates, a fund may not be able to maintain a positive yield or total return and, in relatively low interest rate environments, there are heightened risks associated with rising interest rates.

Credit and liquidity support – Changes in the credit quality of banks and financial institutions providing credit and liquidity support features with respect to securities held by a fund could cause the values of these securities to decline.

Asset allocation – A fund's percentage allocation to equity securities, debt securities and money market instruments could cause the fund to underperform relative to relevant benchmarks and other funds with similar investment objectives.

Liquidity risk – Certain fund holdings may be or may become difficult or impossible to sell, particularly during times of market turmoil. Liquidity may be impacted by the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid or illiquid holdings may be volatile or difficult to determine, and reduced liquidity may have an adverse impact on the market price of such holdings. Additionally,

the sale of less liquid or illiquid holdings may involve substantial delays (including delays in settlement) and additional costs and the fund may be unable to sell such holdings when necessary to meet its liquidity needs, or to try to limit losses, or may be forced to sell at a loss.

Management – The investment adviser to the funds actively manages the funds' investments. Consequently, the funds are subject to the risk that the methods and analyses, including models, tools and data, employed by the investment adviser in this process may be flawed or incorrect and may not produce the desired results. This could cause the funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Investing in the managed risk funds may involve additional risks including, but not limited to, those described below.

Fund structure – The managed risk funds invest in underlying funds and incur expenses related to those underlying funds. In addition, investors in the managed risk funds will incur fees to pay for certain expenses related to the operations of the managed risk funds. An investor holding the underlying fund directly would incur lower overall expenses but would not receive the benefit of the managed risk strategy. Additionally, in accordance with an exemption under the Investment Company Act of 1940, as amended, the investment adviser considers only proprietary funds when selecting underlying investment options and allocations. This means that the fund's investment adviser does not, nor does it expect to, consider any unaffiliated funds as underlying investment options for the fund. This strategy could raise certain conflicts of interest when determining the overall asset allocation of the fund or choosing underlying investments for the fund, including the selection of funds that result in greater compensation to the adviser or funds with relatively lower historical investment results. The investment adviser has policies and procedures designed to mitigate material conflicts of interest that may arise in connection with its management of the fund.

Management – The managed risk funds are subject to the risk that the managed risk strategy or the methods employed by the subadviser in implementing the managed risk strategy may not produce the desired results. This could cause the managed risk funds to lose value or their investment results to lag relevant benchmarks or other funds with similar objectives.

Underlying fund risks – Because the managed risk funds' investments consist of investments in underlying funds, the managed risk funds' risks are directly related to the risks of the respective underlying fund in which each managed risk fund invests. For this reason, it is important to understand the risks associated with investing both in the managed risk fund and in each of the underlying funds.

Investing in options and futures contracts – In addition to the risks generally associated with investing in derivative instruments, options and futures contracts are subject to the creditworthiness of the clearing organizations, exchanges and, in the case of futures, futures commission merchants with which a fund transacts. While both options and futures contracts are generally liquid instruments, under certain market conditions, options and futures may be deemed to be illiquid. For example, a fund may be temporarily prohibited from closing out its position in an options or futures contract if intraday price change limits or limits on trading volume imposed by the applicable exchange are triggered. If a fund is unable to close out a position on an options or futures contract, the fund would remain subject to the risk of adverse price movements until the fund is able to close out the position in question. The ability of a fund to successfully utilize options and futures contracts may depend in part upon the ability of the fund's investment adviser or subadviser to accurately forecast interest rates and other economic factors and to assess and predict the impact of such economic factors on the options and futures in which the fund invests. If the investment adviser or subadviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the options and futures in which it invests, a fund could suffer losses. Whereas the risk of loss on a put option purchased by the fund is limited to the initial cost of the option, the amount of a potential loss on a futures contract could greatly exceed the relatively small initial amount invested in entering the futures position.

Hedging – There may be imperfect or even negative correlation between the prices of the options and futures contracts in which a fund invests and the prices of the underlying securities or indexes which the fund seeks to hedge. For example, options and futures contracts may not provide an effective hedge because changes in options and futures contract prices may not track those of the underlying securities or indexes they are intended to hedge. In addition, there are significant differences between the securities market, on the one hand, and the options and futures markets, on the other, that could result in an imperfect correlation between the markets, causing a given hedge not to achieve its objectives. The degree of imperfection of correlation depends on circumstances such as variations in speculative market demand for options and futures, including technical influences in options and futures trading, and differences between the financial instruments being hedged and the instruments underlying the standard contracts available for trading. A decision as to whether, when and how to hedge involves the exercise of skill and judgment, and even a well-conceived hedge may be unsuccessful to some degree because of market behavior or unexpected interest rate trends. In addition, the fund's investment in exchange-traded options and futures and their resulting costs could limit the fund's gains in rising markets relative to those of the underlying funds, or to those of unhedged funds in general.

Short positions – The fund may suffer losses from short positions in futures contracts. Losses from short positions in futures contracts occur when the underlying index increases in value. As the underlying index increases in value, the holder of the short position in the corresponding futures contract is required to pay the difference in value of the futures contract resulting from the increase in the index on a daily basis. Losses from a short position in an index futures contract could potentially be very large if the value of the underlying index rises dramatically in a short period of time.

Nondiversification risk – As nondiversified funds, the managed risk funds have the ability to invest a larger percentage of their assets in the securities of a smaller number of issuers than diversified funds. To the extent that a managed risk fund invests a larger percentage of its assets in securities of one or more issuers, poor performance by these securities could have a greater adverse impact on the fund's investment results.

5. Certain investment techniques

Securities lending – Some of the funds have entered into securities lending transactions in which the funds earn income by lending investment securities to brokers, dealers or other institutions. Each transaction involves three parties: the fund, acting as the lender of the securities, a borrower, and a lending agent that acts as an intermediary.

Securities lending transactions are entered into by the fund under the securities lending agreement with the lending agent. The lending agent facilitates the exchange of securities between the lender and the borrower, generally provides protection from borrower default, marks to market the value of collateral daily, secures additional collateral from the borrower if it falls below preset terms, and may reinvest the collateral on behalf of the fund according to agreed parameters. The lending agent has indemnified the fund against losses resulting from borrower default. Although risk is mitigated by the collateral and indemnification, the fund could experience a delay in recovering its securities and a potential loss of income or value if the borrower fails to return the securities, collateral investments decline in value or the lending agent fails to perform.

The borrower is required to post highly liquid assets, such as cash or U.S. government securities, as collateral for the loan in an amount at least equal to the value of the securities loaned. Investments made with cash collateral are recognized as assets in the fund's investment portfolio. The same amount is recorded as a liability in the fund's statement of assets and liabilities. While securities are on loan, the fund will continue to receive the equivalent of the interest, dividends or other distributions paid by the issuer, as well as a portion of the interest on the investment of the collateral. Additionally, although the fund does not have the right to vote on securities while they are on loan, the fund has a right to consent on corporate actions and a right to recall loaned securities to vote on proposals affecting them. The borrower is obligated to return the loaned security at the conclusion of the loan or, during the pendency of the loan, on demand from the fund.

The following table presents the value of the securities on loan, the type and value of collateral received and the value of the investment securities purchased, if any, from the cash collateral received by each fund (dollars in thousands):

Funds	Value of investment securities on loan	Collateral received		Value of investment securities purchased
		Cash	U.S. government securities	
Global Growth Fund	\$ 19,320	\$ –	\$21,524	\$ –
Global Small Capitalization Fund	30,423	8,535	23,751	7,682
Growth Fund	21,365	21,892	–	19,703
International Fund	82	86	–	77
New World Fund	1,705	1,117	656	1,005
Washington Mutual Investors Fund	10,510	10,881	–	9,793
Capital World Growth and Income Fund	7,091	7,147	501	6,432
Growth-Income Fund	110,228	115,333	–	103,800
International Growth and Income Fund	2,296	2,250	225	2,025
Capital Income Builder	17,090	17,994	–	16,195
Asset Allocation Fund	24,156	25,242	–	22,718
American Funds Global Balanced Fund	1,039	1,069	–	962

Investment securities purchased from cash collateral are disclosed in the investment portfolio as short-term securities. Securities received as collateral, if any, are not recognized as fund assets. The contractual maturity of collateral received under the securities lending agreement is classified as overnight and continuous.

Index-linked bonds – Some of the funds have invested in index-linked bonds, which are fixed-income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest income in the fund's statement of operations.

Mortgage dollar rolls – Some of the funds have entered into mortgage dollar roll transactions of TBA securities in which the fund sells a TBA mortgage-backed security to a counterparty and simultaneously enters into an agreement with the same counterparty to buy back a similar TBA security on a specific future date at a predetermined price. Mortgage dollar rolls are accounted for as purchase and sale transactions and may result in an increase to the fund's portfolio turnover rate. Portfolio turnover rates excluding and including mortgage dollar rolls are presented at the end of the financial highlights tables.

Loan transactions – Some of the funds have entered into loan transactions in which the fund acquires a loan either through an agent, by assignment from another holder, or as a participation interest in another holder's portion of a loan. The loan is often administered by a financial institution that acts as agent for the holders of the loan, and the fund may be required to receive approval from the agent and/or borrower prior to the sale of the investment. The loan's interest rate and maturity date may change based on the terms of the loan, including potential early payments of principal.

Short-term securities – The managed risk funds hold shares of State Street Institutional U.S. Government Money Market Fund, a cash management vehicle offered and managed by State Street Bank and Trust Company.

Unfunded commitments – Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust have participated in transactions that involve unfunded commitments, which may obligate each fund to purchase new or additional bonds and/or purchase additional shares of the applicable issuer if certain contingencies are met. As of December 31, 2023, the maximum exposure from these unfunded commitments for Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust was \$1,303,000, \$31,000 and \$1,032,000, respectively, which would represent less than 0.01% for Asset Allocation Fund and Capital World Bond Fund and 0.12% for American High-Income Trust, respectively, of the net assets of each fund should such commitments become due. Unrealized depreciation on these unfunded commitments for Asset Allocation Fund, Capital World Bond Fund and American High-Income Trust of \$3,000, less than \$1,000 and \$4,000, respectively, is disclosed as unrealized depreciation on unfunded commitments in each fund's statement of assets and liabilities. Unrealized depreciation is included in net unrealized appreciation (depreciation) on investments in unaffiliated issuers in each fund's statement of operations.

Option contracts – Some of the funds have entered into option contracts, which give the purchaser of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the instrument or index underlying the option) at a specified exercise price. The writer of an option has the obligation, upon exercise of the option, to cash settle or deliver the underlying instrument or index upon payment of the exercise price (in the case of a call) or to cash settle or take delivery of the underlying instrument or index and pay the exercise price (in the case of a put).

By purchasing a put option, the fund obtains the right (but not the obligation) to sell the instrument underlying the option (or to deliver the cash value of the instrument or index underlying the option) at a specified exercise price. In return for this right, the fund pays the current market price, or the option premium, for the option. The fund may terminate its position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the fund will lose the entire amount of the premium paid. If the option is exercised, the fund completes the sale of the underlying instrument (or delivers the cash value of the index underlying the option) at the exercise price. The fund may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

The features of call options are essentially the same as those of put options, except that the purchaser of a call option obtains the right (but not the obligation) to purchase, rather than sell, the underlying instrument (or the cash value of the index underlying the option) at the specified exercise price. The buyer of a call option typically attempts to participate in potential price increases of the underlying instrument or index with risk limited to the cost of the option if the price of the underlying instrument or index falls. At the same time, the call option buyer can expect to suffer a loss if the price of the underlying instrument or index does not rise sufficiently to offset the cost of the option.

The writer of a put or call option takes the opposite side of the transaction from the option purchaser. In return for receipt of the option premium, the writer assumes the obligation to pay or receive the exercise price for the option's underlying instrument or index if the other party to the option chooses to exercise it. The writer may seek to terminate a position in a put option before exercise by entering into opposing close-out transactions in advance of the option expiration date. If the market for the relevant put option is not liquid, however, the writer must be prepared to pay the exercise price while the option is outstanding, regardless of price changes. Writing a call option obligates the writer to, upon exercise of the option, deliver the option's underlying instrument in return for the exercise price or to make a net cash settlement payment, as applicable. The characteristics of writing call options are similar to those of writing put options, except that writing call options is generally a profitable strategy if prices remain the same or fall. The potential gain for the option seller in such a transaction would be capped at the premium received.

Option contracts can be either equity style (premium is paid in full when the option is opened) or futures style (premium moves as part of variation margin over the life of the option, and is paid in full when the option is closed). For equity style options, premiums paid on options purchased, as well as the daily fluctuation in market value, are included in investment securities from unaffiliated issuers in each fund's statement of asset and liabilities, and premiums received on options written, as well as the daily fluctuation in market value, are included in options written at value in each fund's statement of assets and liabilities. For futures style options, on a daily basis for both purchased and written options, the fund pays or receives variation margin based on the premium paid and the daily fluctuation in market value, and records variation margin in the statement of assets and liabilities. Realized gains or losses are recorded at the time the option contract is closed or expires. For purchased options, the net realized gains or losses and net unrealized appreciation or depreciation from equity style options are recorded in investments in unaffiliated issuers in each fund's statement of operations, and from futures style options are recorded in options purchased (futures style) in each fund's statement of operations. For written options, the net realized gains or losses and net unrealized appreciation or depreciation are recorded in options written in each fund's statement of operations.

Option contracts can take different forms. Some of the funds have entered into the following types of options contracts:

Options on equity indexes – As part of their managed risk strategy, the managed risk funds will at times purchase put options on equity indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities.

Options on futures – One of the funds has entered into options on future contracts to seek to manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. An option on a futures contract gives the purchaser of the option the right to buy or sell a position in a futures contract from or to the writer of the option, at a specified price on or before the specified expiration date.

Futures contracts – Some of the funds have entered into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made. Futures contracts are used to strategically manage the fund's interest rate sensitivity by increasing or decreasing the duration of the fund or a portion of the fund's portfolio. For the managed risk funds, futures contracts are used to strategically manage portfolio volatility and downside equity risk.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, known as a futures commission merchant ("FCM"), in a segregated account in the name of the FCM an amount of cash, U.S. government securities or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract.

On a daily basis, each fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in each fund's statement of assets and liabilities. Futures contracts may involve a risk of loss in excess of the variation margin shown on each fund's statement of assets and liabilities. Each fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net unrealized appreciation or depreciation from futures contracts are recorded in each fund's statement of operations.

Forward currency contracts – Some of the funds have entered into forward currency contracts, which represent agreements to exchange currencies on specific future dates at predetermined rates. The series' investment adviser uses forward currency contracts to manage the fund's exposure to changes in exchange rates. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates.

On a daily basis, the series' investment adviser values forward currency contracts based on the applicable exchange rates and records unrealized appreciation or depreciation for open forward currency contracts in each fund's statement of assets and liabilities. Realized gains or losses are recorded at the time the forward contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed forward currency contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in each fund's statement of assets and liabilities. Net realized gains or losses from closed forward currency contracts and net unrealized appreciation or depreciation from open forward currency contracts are recorded in each fund's statement of operations.

Swap contracts – Some of the funds have entered into swap agreements, which are two-party contracts entered into primarily by institutional investors for a specified time period. In a typical swap transaction, two parties agree to exchange the returns earned or realized from one or more underlying assets or rates of return. Swap agreements can be traded on a swap execution facility (SEF) and cleared through a central clearinghouse (cleared), traded over-the-counter (OTC) and cleared, or traded bilaterally and not cleared. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, and margin is required to be exchanged under the rules of the clearinghouse, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps. To the extent the funds enter into bilaterally negotiated swap transactions, the funds will enter into swap agreements only with counterparties that meet certain credit standards and subject to agreed collateralized procedures. The term of a swap can be days, months or years and certain swaps may be less liquid than others.

Upon entering into a centrally cleared swap contract, the funds are required to deposit cash, U.S. government securities or other liquid securities, which is known as initial margin. Generally, the initial margin required for a particular swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in the funds' statement of assets and liabilities for centrally cleared swaps and as unrealized appreciation or depreciation in the funds' statement of assets and liabilities for bilateral swaps. For centrally cleared swaps, the fund also pays or receives a variation margin based on the increase or decrease in the value of the swaps, including accrued interest as applicable, and records variation margin in the statement of assets and liabilities. The funds record realized gains and losses on both the net accrued interest and any gain or loss recognized at the time the swap is closed or expires. Net realized gains or losses, as well as any net unrealized appreciation or depreciation, from swaps are recorded in the funds' statement of operations.

Swap agreements can take different forms. Some of the funds have entered into the following types of swap agreements:

Interest rate swaps – Some of the funds have entered into interest rate swaps, which seek to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the funds or a portion of the funds' portfolio. An interest rate swap is an agreement between two parties to exchange or swap payments based on changes in an interest rate or rates. Typically, one interest rate is fixed and the other is variable based on a designated short-term interest rate such as the Secured Overnight Financing Rate (SOFR), prime rate or other benchmark. In other types of interest rate swaps, known as basis swaps, the parties agree to swap variable interest rates based on different designated short-term interest rates. Interest rate swaps generally do not involve the delivery of securities or other principal amounts. Rather, cash payments are exchanged by the parties based on the application of the designated interest rates to a notional amount, which is the predetermined dollar principal of the trade upon which payment obligations are computed. Accordingly, the funds' current obligation or right under the swap agreement is generally equal to the net amount to be paid or received under the swap agreement based on the relative value of the position held by each party.

Credit default swap indices – Some of the funds have entered into centrally cleared credit default swap indices, including CDX and iTraxx indices (collectively referred to as "CDSIs"), in order to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks. A CDSI is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDSI transaction, one party (the protection buyer) is obligated to pay the other party (the protection seller) a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits.

The funds may enter into a CDSI transaction as either protection buyer or protection seller. If the funds are protection buyers, they would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit events were to occur with respect to any of the underlying reference obligations. However, if a credit event did occur, the funds, as protection buyers, would have the right to deliver the referenced debt obligations or a specified amount of cash, depending on the terms of the applicable agreement, and to receive the par value of such debt obligations from the counterparty protection seller. As protection sellers, the funds would receive fixed payments throughout the term of the contract if no credit events were to occur with respect to any of the underlying reference obligations. If a credit event were to occur, however, the value of any deliverable obligation received by the funds, coupled with the periodic payments previously received by the funds, may be less than the full notional value that the funds, as a protection seller, pays to the counterparty protection buyer, effectively resulting in a loss of value to the funds. Furthermore, as protection sellers, the funds would effectively add leverage to their portfolio because it would have investment exposure to the notional amount of the swap transaction.

The following table presents the average month-end notional amounts of options contracts purchased, futures contracts, forward currency contracts, interest rate swaps and credit default swaps while held for each fund (dollars in thousands):

	Options on futures	Options on equity indexes	Futures contracts	Forward currency contracts	Interest rate swaps	Credit default swaps

²Includes cumulative appreciation/depreciation on futures contracts, centrally cleared interest rate swaps and/or centrally cleared credit default swaps as reported in the applicable table following each fund's investment portfolio. Only current day's variation margin is reported within each fund's statement of assets and liabilities.

³Includes options purchased as reported in each fund's investment portfolio.

Collateral – Some funds either receive or pledge highly liquid assets, such as cash or U.S. government securities, as collateral due to securities lending and/or their use of option contracts, futures contracts, forward currency contracts, interest rate swaps, credit default swaps and/or future delivery contracts. For securities lending, each participating fund receives collateral in exchange for lending investment securities. The lending agent may reinvest collateral from securities lending transactions according to agreed parameters. For options on equity indexes, options on futures, futures contracts, centrally cleared interest rate swaps and centrally cleared credit default swaps, the program calls for each participating fund to pledge collateral for initial and variation margin by contract. For forward currency contracts and bilateral swaps, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by counterparty. For future delivery contracts, the program calls for each participating fund to either receive or pledge collateral based on the net gain or loss on unsettled contracts by certain counterparties. The purpose of the collateral is to cover potential losses that could occur in the event that either party cannot meet its contractual obligation. Non-cash collateral pledged by each participating fund, if any, is disclosed in each fund’s investment portfolio, and cash collateral pledged by each participating fund, if any, is held in a segregated account with the fund’s custodian, which is reflected as pledged cash collateral in each fund’s statement of assets and liabilities.

Rights of offset – Funds that hold forward currency contracts and bilateral swaps have enforceable master netting agreements with certain counterparties, where amounts payable by each party to the other in the same currency (with the same settlement date and with the same counterparty) are settled net of each party’s payment obligation. If an early termination date occurs under these agreements following an event of default or termination event, all obligations of each party to its counterparty are settled net through a single payment in a single currency (“close-out netting”). For financial reporting purposes, the funds do not offset financial assets and financial liabilities that are subject to these master netting arrangements in the statements of assets and liabilities.

The tables on the following pages present each fund’s forward currency contracts and bilateral swaps by counterparty that are subject to master netting agreements but that are not offset in the funds’ statements of assets and liabilities. The net amount column shows the impact of offsetting on the funds’ statement of assets and liabilities as of December 31, 2023, if close-out netting was exercised (dollars in thousands):

*Collateral is shown on a settlement basis.

6. Taxation and distributions

Federal income taxation – Each fund complies with the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and intends to distribute substantially all of its net taxable income and net capital gains each year. The funds are not subject to income taxes to the extent such distributions are made. Therefore, no federal income tax provision is required.

As of and during the year ended December 31, 2023, none of the funds had a liability for any unrecognized tax benefits. Each fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in their respective statements of operations. During the year, none of the funds incurred any significant interest or penalties.

Each fund's tax returns are generally not subject to examination by federal, state and, if applicable, non-U.S. tax authorities after the expiration of each jurisdiction's statute of limitations, which is typically three years after the date of filing but can be extended in certain jurisdictions.

Non-U.S. taxation – Dividend and interest income, if any, are recorded net of non-U.S. taxes paid. The funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. As a result of rulings from European courts, the funds filed for additional reclaims related to prior years. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability. During the year ended December 31, 2023, some of the funds recognized reclaims (net of fees and the effect of realized gain or loss from currency translations) and interest related to European court rulings as follows (dollars in thousands):

Fund	Reclaims	Fees	Interest
Global Growth Fund	\$ 695	\$23	\$144
Growth Fund	386	3	16
International Fund	11,142	52	649
New World Fund	269	3	–
Capital World Growth and Income Fund	212	6	12
Growth-Income Fund	266	15	14
International Growth and Income Fund	397	2	25
Asset Allocation Fund	313	2	18
American Funds Global Balanced Fund	8	–	–*

*Amount less than one thousand.

The reclaims and interest are included in dividend income and interest income, respectively, in each fund's statements of operations. Gains realized by the funds on the sale of securities in certain countries, if any, may be subject to non-U.S. taxes. The funds generally record an estimated deferred tax liability based on unrealized gains to provide for potential non-U.S. taxes payable upon the sale of these securities.

Distributions – Distributions determined on a tax basis may differ from net investment income and net realized gains for financial reporting purposes. These differences are due primarily to different treatment for items such as currency gains and losses; short-term capital gains and losses; capital losses related to sales of certain securities within 30 days of purchase; unrealized appreciation of certain investments in securities outside the U.S.; deferred expenses; cost of investments sold; paydowns on fixed-income securities; net capital losses; non-U.S. taxes on capital gains; amortization of premiums and discounts and income on certain investments. The fiscal year in which amounts are distributed may differ from the year in which the net investment income and net realized gains are recorded by the funds for financial reporting purposes.

Additional tax basis disclosures for each fund as of December 31, 2023, were as follows (dollars in thousands):

	Global Growth Fund	Global Small Capitalization Fund	Growth Fund	International Fund	New World Fund	Washington Mutual Investors Fund

7. Fees and transactions

CRMC, the series' investment adviser, is the parent company of American Funds Distributors®, Inc. ("AFD"), the distributor of the series' shares, and American Funds Service Company® ("AFS"), the series' transfer agent. CRMC, AFD and AFS are considered related parties to the series.

Investment advisory services – The series has an investment advisory and service agreement with CRMC that provides for monthly fees accrued daily. These fees are based on annual rates that generally decrease as net asset levels increase. CRMC receives investment advisory fees from the underlying funds held by the managed risk funds, which are included in the unaudited net effective expense ratios that are provided as additional information in the financial highlights tables. Subadvisory fees for the managed risk funds are paid by CRMC to Milliman FRM. The managed risk funds are not responsible for paying any subadvisory fees.

Investment advisory services waivers – CRMC is waiving a portion of its investment advisory services fees for some of the funds. For the year ended December 31, 2023, total investment advisory services fees waived by CRMC were \$54,733,000. CRMC does not intend to recoup these waivers. Investment advisory fees in each fund's statement of operations are presented gross of any waivers from CRMC.

The range of rates, net asset levels and the current annualized rates of average daily net assets for each fund before and after any investment advisory services waivers, if applicable, are as follows:

Fund	Rates		Net asset level (in billions)		For the year ended December 31, 2023, before waiver	For the year ended December 31, 2023, after waiver

Class-specific fees and expenses – Expenses that are specific to individual share classes are accrued directly to the respective share class. The principal class-specific fees and expenses are further described below:

Distribution services – The series has plans of distribution for all share classes except Class 1. Under the plans, the board of trustees approves certain categories of expenses that are used to finance activities primarily intended to sell fund shares. The plans provide for payments to pay service fees to firms that have entered into agreements with the series. These payments, based on an annualized percentage of average daily net assets, range from 0.18% to 0.50% as noted in the table below. In some cases, the board of trustees has limited the amounts that may be paid to less than the maximum allowed by the plans.

Share class	Currently approved limits	Plan limits
Class 1A	0.00%	0.25%
Class 2	0.25	0.25
Class 3	0.18	0.18
Class 4	0.25	0.25
Class P1	0.00	0.25
Class P2	0.25	0.50

Insurance administrative services – The series has an insurance administrative services plan for Class 1A, 4, P1 and P2 shares. Under the plan, these share classes pay 0.25% of each insurance company's respective average daily net assets in each share class to compensate the insurance companies for services provided to their separate accounts and contractholders for which the shares of the fund are beneficially owned as underlying investments of such contractholders' annuities. These services include, but are not limited to, maintenance, shareholder communications and transactional services. The insurance companies are not related parties to the series.

Transfer agent services – The series has a shareholder services agreement with AFS under which the funds compensate AFS for providing transfer agent services to all of the funds' share classes. These services include recordkeeping, shareholder communications and transaction processing. In addition, the managed risk funds reimburse AFS for amounts paid to third parties for performing transfer agent services on behalf of fund shareholders.

Administrative services – The series has an administrative services agreement with CRMC under which each fund compensates CRMC for providing administrative services to all of the funds' share classes except Class P1 and P2 shares. Administrative services are provided by CRMC and its affiliates to help assist third parties providing non-distribution services to fund shareholders. These services include providing in-depth information on each fund and market developments that impact fund investments. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to fund shareholders. The agreement provides each fund, other than the managed risk funds, the ability to charge an administrative services fee at the annual rate of 0.05% of average daily net assets attributable to each share class. Currently each fund, other than the managed-risk funds, pays CRMC an administrative services fee at the annual rate of 0.03% of average daily net assets of each share class for CRMC's provision of administrative services. For the managed risk funds, CRMC receives administrative services fees at an annual rate of 0.03% of average daily net assets from Class 1 shares of the underlying funds for administrative services provided to the series.

Accounting and administrative services – The managed risk funds have a subadministration agreement with Bank of New York Mellon ("BNY Mellon") under which the fund compensates BNY Mellon for providing accounting and administrative services to each of the managed risk funds' share classes. These services include, but are not limited to, fund accounting (including calculation of net asset value), financial reporting and tax services. BNY Mellon is not a related party to the managed risk funds.

Class-specific expenses under the agreements described above were as follows (dollars in thousands):

*Amount less than one thousand.

Miscellaneous fee reimbursements – CRMC reimbursed a portion of miscellaneous fees and expenses for Managed Risk International Fund and Managed Risk Washington Mutual Investors Fund. These reimbursements may be adjusted or discontinued by CRMC, subject to any restrictions in the series’ prospectus. For the year ended December 31, 2023, total fees and expenses reimbursed by CRMC were \$67,000. CRMC does not intend to recoup these reimbursements. Fees and expenses in each fund’s statement of operations are presented gross of any reimbursements from CRMC.

Trustees’ deferred compensation – Trustees who are unaffiliated with CRMC may elect to defer the cash payment of part or all of their compensation. These deferred amounts, which remain as liabilities of the funds, are treated as if invested in one or more of the American Funds. These amounts represent general, unsecured liabilities of the funds and vary according to the total returns of the selected funds. Trustees’ compensation, shown on the accompanying financial statements, reflects current fees (either paid in cash or deferred) and a net increase in the value of the deferred amounts as follows (dollars in thousands):

Fund	Current fees	Increase in value of deferred amounts	Total trustees’ compensation

Affiliated officers and trustees – Officers and certain trustees of the series are or may be considered to be affiliated with CRMC, AFD and AFS. No affiliated officers or trustees received any compensation directly from any fund in the series.

Investments in CCBF and CCF – Some of the funds hold shares of CCBF, a corporate bond fund, and/or CCF, an institutional prime money market fund, which are both managed by CRMC. CCBF seeks to provide maximum total return consistent with capital preservation and prudent risk management by investing primarily in corporate debt instruments. CCBF is used as an investment vehicle for some of the funds’ corporate bond investments. CCF invests in high-quality, short-term money market instruments. CCF is used as the primary investment vehicle for some of the funds’ short-term investments. Both CCBF and CCF shares are only available for purchase by CRMC, its affiliates, and other funds managed by CRMC or its affiliates, and are not available to the public. CRMC does not receive an investment advisory services fee from either CCBF or CCF.

Security transactions with related funds – The funds may purchase from, or sell securities to, other CRMC-managed funds (or funds managed by certain affiliates of CRMC) under procedures adopted by the fund’s board of trustees. The funds involved in such transactions are considered related by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers. When such transactions occur, each transaction is executed at the current market price of the security and no brokerage commissions or fees are paid in accordance with Rule 17a-7 of the 1940 Act.

The following table presents purchase and sale transactions between each fund and related funds, and net realized gain or loss from such sales, if any, as of December 31, 2023 (dollars in thousands):

Fund	Purchases	Sales	Net realized gain (loss)
Global Growth Fund	\$143,889	\$ 87,197	\$ 9,634
Global Small Capitalization Fund	9,942	11,693	8,672

American Funds Global Balanced Fund	4,519	1,414	(220)
American High-Income Trust	–	398	270

8. Indemnifications

The series' organizational documents provide board members and officers with indemnification against certain liabilities or expenses in connection with the performance of their duties to the series. In the normal course of business, the series may also enter into contracts that provide general indemnifications. Each fund's maximum exposure under these arrangements is unknown since it is dependent on future claims that may be made against the series. The risk of material loss from such claims is considered remote. Insurance policies are also available to the series' board members and officers.

9. Committed line of credit

Global Small Capitalization Fund, New World Fund and American High-Income Trust participate with other funds managed by CRMC in a \$1.5 billion credit facility (the "line of credit") to be utilized for temporary purposes to fund shareholder redemptions. Each fund has agreed to pay commitment fees on its pro-rata portion of the line of credit, which are reflected in other expenses in each fund's statement of operations. None of the funds borrowed on this line of credit at any time during the year ended December 31, 2023.

10. Capital share transactions

Capital share transactions in each fund were as follows (dollars and shares in thousands):

¹Based on average shares outstanding.

²This column reflects the impact of certain waivers/reimbursements from CRMC. During some of the years shown, CRMC waived a portion of investment advisory services fees on some funds, including each of the managed risk funds. In addition, during some of the years shown, CRMC reimbursed a portion of miscellaneous fees and expenses for some of the managed risk funds.

³Ratios do not include expenses of any Central Funds. The fund indirectly bears its proportionate share of the expenses of any Central Funds, if applicable.

⁴Amount less than \$.01.

⁵Amount less than .01%.

⁶Amount less than \$1 million.

⁷This column does not include expenses of the underlying funds in which each fund invests.

⁸This column reflects the net effective expense ratios for each fund and class, which include each class's expense ratio combined with the weighted average net expense ratio of the underlying funds for the periods presented. The net effective expense ratios for certain of the periods presented have been revised to reflect management fee waivers then in effect on certain of the underlying funds, resulting in a lower net effective expense ratio in each case. Refer to the expense example for further information regarding fees and expenses.

⁹The net effective expense ratios (original and revised, as applicable) were unaudited.

¹⁰All or a significant portion of assets in this class consisted of seed capital invested by CRMC and/or its affiliates. Certain fees (including, where applicable, fees for distribution services) are not charged or accrued on these seed capital assets. If such fees were paid by the fund on seed capital assets, fund expenses would have been higher and net income and total return would have been lower.

¹¹Refer to Note 5 for further information on mortgage dollar rolls.

¹²Rates do not include the fund's portfolio activity with respect to any Central Funds, if applicable.

¹³Amount is either less than 1% or there is no turnover.

Refer to the notes to financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of American Funds Insurance Series and Shareholders of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund, Washington Mutual Investors Fund, Capital World Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder, Asset Allocation Fund, American Funds Global Balanced Fund, The Bond Fund of America, Capital World Bond Fund, American High-Income Trust, American Funds Mortgage Fund, Ultra-Short Bond Fund, U.S. Government Securities Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Washington Mutual Investors Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the investment portfolios, of Global Growth Fund, Global Small Capitalization Fund, Growth Fund, International Fund, New World Fund, Washington Mutual Investors Fund, Capital World Growth and Income Fund, Growth-Income Fund, International Growth and Income Fund, Capital Income Builder, Asset Allocation Fund, American Funds Global Balanced Fund (formerly Global Balanced Fund), The Bond Fund of America, Capital World Bond Fund, American High-Income Trust, American Funds Mortgage Fund, Ultra-Short Bond Fund, U.S. Government Securities Fund, Managed Risk Growth Fund, Managed Risk International Fund, Managed Risk Washington Mutual Investors Fund, Managed Risk Growth-Income Fund and Managed Risk Asset Allocation Fund (twenty-three of the funds constituting American Funds Insurance Series, hereafter collectively referred to as the "Funds") as of December 31, 2023, the related statements of operations for the year ended December 31, 2023, the statements of changes in net assets for each of the two years in the period ended December 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2023, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2023 and each of the financial highlights for each of the five years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2023 by correspondence with the custodian, transfer agent and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP

Los Angeles, California
February 12, 2024

We have served as the auditor of one or more investment companies in The Capital Group group of investment companies since 1934.

The funds in American Funds Insurance Series serve as the underlying investment vehicle for various insurance products. As an owner of an insurance contract that invests in one of the funds in the series, you incur two types of costs: (1) transaction costs, such as initial sales charges on purchase payments and contingent deferred sales charges on redemptions (loads), and (2) ongoing costs, including management fees, distribution and service (12b-1) fees, and other expenses. Additional fees are charged by the insurance companies related to the various benefits they provide. This example is intended to help you understand your ongoing costs (in dollars) of investing in the underlying funds so you can compare these costs with the ongoing costs of investing in other mutual funds that serve a similar function in other annuity products. The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire six-month period (July 1, 2023, through December 31, 2023).

Actual expenses:

The first line of each share class in the tables on the following pages provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading titled "Expenses paid during period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes:

The second line of each share class in the tables on the following pages provides information about hypothetical account values and hypothetical expenses based on the actual expense ratio for the share class and an assumed rate of return of 5.00% per year before expenses, which is not the actual return of the share class. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the fund and other funds. To do so, compare this 5.00% hypothetical example with the 5.00% hypothetical examples that appear in the shareholder reports of the other funds.

Notes:

Additional fees are charged by the insurance companies related to the various benefits they provide. You can estimate the impact of these fees by adding the amount of the fees to the total estimated expenses you paid on your account during the period as calculated above. In addition, your ending account value would be lower by the amount of these fees.

Note that the expenses shown in the tables on the following pages are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of each share class in the tables is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

¹The “expenses paid during period” are equal to the “annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the one-half year period).

²The “expenses paid during period” and “annualized expense ratio” do not include the expenses of the underlying funds in which each fund invests.

³The “effective expenses paid during period” are equal to the “effective annualized expense ratio,” multiplied by the average account value over the period, multiplied by the number of days in the period, and divided by 365 (to reflect the period).

⁴The “effective annualized expense ratio” reflects the net annualized expense ratio of the class plus the class’s pro-rata share of the weighted average expense ratio of the underlying funds in which it invests.

The series has adopted a liquidity risk management program (the “program”). The series’ board has designated Capital Research and Management Company (“CRMC”) as the administrator of the program. Personnel of CRMC or its affiliates conduct the day-to-day operation of the program pursuant to policies and procedures administered by the Capital Group Liquidity Risk Management Committee.

Under the program, CRMC manages each fund’s liquidity risk, which is the risk that the fund could not meet shareholder redemption requests without significant dilution of remaining shareholders’ interests in the fund. This risk is managed by monitoring the degree of liquidity of each fund’s investments, limiting the amount of each fund’s illiquid investments, and utilizing various risk management tools and facilities available to each fund for meeting shareholder redemptions, among other means. CRMC’s process of determining the degree of liquidity of each fund’s investments is supported by one or more third-party liquidity assessment vendors.

The series’ board reviewed a report prepared by CRMC regarding the operation and effectiveness of the program for the period October 1, 2022, through September 30, 2023. No significant liquidity events impacting any of the funds were noted in the report. In addition, CRMC provided its assessment that the program had been effective in managing each fund’s liquidity risk.

¹ The term independent trustee refers to a trustee who is not an “interested person” of the series within the meaning of the Investment Company Act of 1940.

² Trustees and officers of the series serve until their resignation, removal or retirement.

³ This includes all directorships/trusteeships (other than those in the American Funds or other funds managed by Capital Research and Management Company or its affiliates) that are held by each trustee as a trustee or director of a public company or a registered investment company.

⁴ The term interested trustee refers to a trustee who is an “interested person” within the meaning of the Investment Company Act of 1940, on the basis of their affiliation with the series investment adviser, Capital Research and Management Company, or affiliated entities (including the series principal underwriter).

⁵ All of the trustees and/or officers listed are officers and/or directors/trustees of one or more of the other funds for which Capital Research and Management Company serves as investment adviser.

⁶ Company affiliated with Capital Research and Management Company.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the series prospectuses and summary prospectuses, which can be obtained from your financial professional and should be read carefully before investing. You may also call American Funds Service Company (AFS) at (800) 421-4225 or visit the Capital Group website at capitalgroup.com/afis.

"American Funds Proxy Voting Procedures and Principles" – which describes how we vote proxies relating to portfolio securities – is available on the Capital Group website or upon request by calling AFS. The series files its proxy voting record with the U.S. Securities and Exchange Commission (SEC) for the 12 months ended June 30 by August 31. The proxy voting record is available free of charge on the SEC website at sec.gov and on the Capital Group website.

American Funds Insurance Series files a complete list of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form NPORT-P. This filing is available free of charge on the SEC website and our website.

This report is for the information of American Funds Insurance Series investors, but it also may be used as sales literature when preceded or accompanied by the current prospectuses or summary prospectuses for American Funds Insurance Series and the prospectus for the applicable insurance contract, which give details about charges, expenses, investment objectives and operating policies of the series. If used as sales material after March 31, 2024, this report must be accompanied by a statistical update for the most recently completed calendar quarter.

Fund attribution data was produced using FactSet, a third-party software system, based on daily portfolios. Securities in their initial period of acquisition may not be included in this analysis. The analysis includes equity investments only and excludes forward contracts and fixed income investments, if applicable. It does not account for buy-and-sell transactions that might have occurred intraday. As a result, average portfolio weight percentages are approximate, and the actual average portfolio weight percentages might be higher or lower. Data elements, such as pricing, income, market cap, etc., were provided by FactSet. The indexes provided for attribution are based on FactSet's methodology. The indexes are broad-based market benchmarks and may not be used by Capital Group® as the sole comparative index for the funds. Capital Group believes the software and information from FactSet to be reliable. However, Capital Group cannot be responsible for inaccuracies, incomplete information or updating of information by FactSet.

Hedge instruments, including exchange-traded futures contracts and exchange-traded put options, may not provide an effective hedge of the underlying securities because changes in the prices of such instruments may not track those of the securities they are intended to hedge. In addition, the managed risk strategy may not effectively protect the funds from market declines and will limit the funds' participation in market gains. The use of the managed risk strategy could cause the funds' returns to lag those of the applicable underlying funds in certain rising market conditions.

American Funds Distributors, Inc.

The Capital Advantage[®]

Since 1931, Capital Group, home of American Funds, has helped investors pursue long-term investment success. Our consistent approach – in combination with The Capital System[™] – has resulted in superior outcomes.

Aligned with investor success

We base our decisions on a long-term perspective, which we believe aligns our goals with the interests of our clients. American Funds Insurance Series portfolio managers average 28 years of investment industry experience, including 23 years at our company, reflecting a career commitment to our long-term approach.¹

The Capital System

The Capital System combines individual accountability with teamwork. Funds using The Capital System are divided into portions that are managed independently by investment professionals with diverse backgrounds, ages and investment approaches. An extensive global research effort is the backbone of our system.

American Funds Insurance Series' superior outcomes

American Funds Insurance Series equity-focused funds have beaten their comparable Lipper indexes in 88% of 10-year periods and 100% of 20-year periods.² Our fixed income funds have helped investors achieve diversification through attention to correlation between bonds and equities.³ We strive to keep management fees competitive. Over the past 20 years, most funds' fees have been below industry averages.⁴

¹ Portfolio manager experience as of the American Funds Insurance Series prospectus dated May 1, 2023.

² Based on Class 1 share results for rolling calendar-year periods starting the first full calendar year after each fund's inception through December 31, 2022. Periods covered are the shorter of the fund's lifetime or since the inception date of the comparable Lipper index or average. The comparable Lipper indexes are: Global Funds Index (Global Growth Fund, Capital World Growth and Income Fund), Growth Funds Index (Growth Fund), International Funds Index (International Fund, International Growth and Income Fund), Emerging Markets Funds Index (New World Fund), Growth & Income Funds Index (Washington Mutual Investors Fund, Growth and Income Fund) and Balanced Funds Index (Asset Allocation Fund). The Lipper Global Small-/Mid-Cap Funds Average was used for Global Small Capitalization Fund. Lipper source: Refinitiv Lipper. There have been periods when the fund has lagged the index.

³ Based on Class 1 share results as of December 31, 2022. Four of our five fixed income American Funds that have been in existence for the three year period showed a three-year correlation lower than their respective Morningstar peer group averages. S&P 500 Index was used as an equity market proxy. Correlation based on monthly total returns. Correlation is a statistical measure of how two securities move in relation to each other. A correlation ranges from -1 to 1. A positive correlation close to 1 implies that as one security moves, either up or down, the other security will move in "lockstep," in the same direction. A negative correlation close to -1 indicates that the securities have moved in the opposite direction.

⁴ Based on management fees for the 20-year period ended December 31, 2022, versus comparable Lipper categories, excluding funds of funds.
