

American Funds Emerging Markets Bond Fund®

Income

Class A shares

EBNAX

Q2 fund fact sheet

Data as of June 30, 2024, unless otherwise noted

CAPITAL GROUP® | **AMERICAN FUNDS®**

Key information

Objective:

The fund's investment objective is to provide a high level of total return over the long term, of which current income is a large component.

Distinguishing characteristics:

This strategy takes a differentiated approach by investing in the full universe of emerging markets debt. It invests in both sovereign and corporate bonds, denominated in either U.S. dollar or local currency issues, which may serve as a source of favorable returns and potential diversification. As pioneers in emerging markets investing, this strategy leverages our 20-year track record of managing emerging markets bond portfolios.

Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Investing for short periods makes losses more likely. Prices and returns will vary, so investors may lose money. For current information and month-end results, visit capitalgroup.com.

Returns shown at maximum offering price (MOP) for Class A shares reflect deduction of the 3.75% maximum sales charge.

Returns at net asset value (NAV) do not reflect a sales charge. If a sales charge had been deducted, the results would have been lower.

Calendar-year total returns (%)

Investment results

Data for periods ended 06/30/2024 (%)	Cumulative total returns ^{5,6}			Average annual total returns ^{5,7}			
	3M	YTD	1Y	3Y	5Y	10Y	Lifetime

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing. This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered.

The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds.

Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

Rating exposure (%)	
U.S. Treasuries and agencies	3.3
AAA/Aaa	1.0
AA/Aa	3.2
A	17.9
BBB/Baa	29.9
BB/Ba	23.0
B	10.6
CCC/Caa & below	2.3
Unrated	0.2
Other ⁹	0.1
Cash & equivalents ¹⁰	8.4

Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch, as an indication of an issuer's creditworthiness. For most funds, unless otherwise noted below, if agency ratings differ, a security will be considered to have received the highest of those ratings, consistent with applicable investment policies. Securities in the Unrated category have not been rated by a rating agency; however, the investment adviser performs its own credit analysis and assigns comparable ratings that are used for compliance with applicable investment policies.

Top fixed income issuers (%) ⁸	
South Africa, Republic of	6.5
Mexico (United Mexican States) (Government)	5.9

South Africa	7.7
Indonesia	6.3
Poland	4.8
Colombia	4.1
Malaysia	3.9
United States	3.7
China	2.6
Thailand	2.5

Nondiversified funds have the ability to invest a larger percentage of assets in securities of individual issuers than a diversified fund. As a result, a single issuer could adversely affect a fund's results more than if the fund invested a smaller percentage of assets in securities of that issuer. Refer to the applicable prospectus for details. (American Funds Emerging Markets Bond Fund)

There have been periods when the results lagged the index(es) and/or average(s). The indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index.

This report, and any product, index or fund referred to herein, is not sponsored, endorsed or promoted in any way by J.P. Morgan or any of its affiliates who provide no warranties whatsoever, express or implied, and shall have no liability to any prospective investor, in connection with this report. J.P. Morgan disclaimer: <https://www.jpmm.com/research/disclosures>

All Capital Group trademarks mentioned are owned by The Capital Group Companies, Inc., an affiliated company or fund. All other company and product names mentioned are the property of their respective companies.

Portfolios are managed, so holdings will change. Certain fixed income and/or cash and equivalents holdings may be held through mutual funds managed by the investment adviser or its affiliates that are not offered to the public.

Totals may not reconcile due to rounding.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower and net expenses higher. Please refer to capitalgroup.com for more information. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

- The SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities while the distribution rate reflects the fund's past dividends paid to shareholders. Accordingly, the fund's SEC yield and distribution rate may differ.
A portion of the fund's distribution may be classified as a return of capital. Please refer to the fund's Annual Report for details.
- Expense ratios are as of each fund's prospectus available at the time of publication.
- Sector breakdown "other" may include equities, rights, warrants, preferreds, convertibles, forwards, swaps, futures, FX (foreign exchange) options and futures options.
- Includes cash, short-term securities, other assets less liabilities, and may include accrued income. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.
- When applicable, returns for less than one year are not annualized, but calculated as cumulative total returns.
- YTD (year-to-date return): For the period from January 1 of the current year to the date shown or from inception date if first offered after January 1 of the current year.
- Index and/or average lifetime is based on inception date of the fund.
- The information shown does not include cash and cash equivalents. This includes shares of money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.
- Rating exposure "Other" may include equities, rights, warrants, preferreds, convertibles, forwards and FX (foreign exchange) options.
- Includes cash, short-term securities, other assets less liabilities, and may include accrued income. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

Bond Statistic Average Yield to Worst: Lower of Yield to Maturity or the bond's total return if put or call options are exercised prior to maturity but no default occurs. **Bond Statistic Effective Duration in Years:** Effective duration is a duration calculation for bonds that takes into account that expected cash flows will fluctuate as interest rates change. **Distribution Rate 12-Month:** The income per share paid by the fund over the past 12 months to an investor from dividends (including any special dividends). The distribution rate is expressed as a percentage of the current price. **Yield Annualized 30-Day SEC:** The 30-day SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities calculated according to the standardized SEC formula; when applicable, it reflects the maximum sales charge. If shown, a net yield reflects fee waivers and/or expense reimbursements in effect during the period. Without waivers and/or reimbursements, the yield would be reduced. Gross yield does not adjust for any fee waivers and/or expense reimbursements in effect. **J.P. Morgan Emerging Markets Bond Index (EMBI) Global Diversified:** The J.P. Morgan Emerging Market Bond Index (EMBI) Global Diversified is a uniquely weighted emerging market debt benchmark that tracks total returns for U.S. dollar-denominated bonds issued by emerging market sovereign and quasi-sovereign entities. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of account fees, expenses or U.S. federal income taxes. **Morningstar Category:** In an effort to classify funds by what they own, as well as by their prospectus objectives and styles, Morningstar developed Morningstar Categories. While the prospectus objective identifies a fund's investment goals based on the wording in the fund prospectus, the Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings (portfolio and other statistics over the past three years).
